*If you open this document in **Safari** browser on your phone the models may be blurry. Idk why, it's a Safari thing. If you open it with google or chrome on your phone it should be fine. If you are on mobile I recommend you download the **Google Docs app** and when you click the link from my website it will just auto open it in the Google Docs app and the images will appear fine.

MEMO

-2:42pm

Large slate of MLB today. We had a good day betting underdogs on sunday. Started Mon morning off with another dog winner in Oakland. But then i looked and all the night games the favorites won. Good thing we got our early winner lol. So after a little run by the dogs for seemingly a day the favorites stay hot. And books were quick to shade the lines there way today. So some solid value throughout the MLB slate and hopefully we can capitalize.

-11:32am

Been a great last couple days fam. 8-2 overall. Hopefully its the start of a solid run. MLB ive been bery pleased with the model and I hope you have enjoyed the new content. Seems to be working out quite well and its been really fun on my end not only making these but using them daily.

MLB will be posted a little later today. No rush first game isnt until 6. So ill have K Model and MLB model posted around the same time today. Been a solid run last couple days so looking to stay hot tonight.

Ugh the Lakers man. We cash +7 with ease but man they really ripped my heart out blowing that game last night. For tonight i got my eyes on Phoenix +3. Not sure if ill pull the trigger. Will prob be a larger slate of MLB today so no reason to force action but if i play anything in NBA it will be Phoenix.

I mentioned yesterday im working on an NHL model. Day 1 had NYI and LAK. Both lost. NYI lost in incredible fashion. Like I said im just building this and tracking progress to see if I have something to work with next year. Obviously a shit time of year to be testing a new model with so few games but i figured why not. Tonight it likes Washington, Tampa Bay, and Winnipeg. So like i said yesteray if you want to follow allowing with these and play them yourself i advise extreme caution since its only Day 2 of me tracking model results. Personally Im not even playing these myself but I will be keeping an eye on the games to see how the model performs.

Kenta Maeda 5+ (+158)
Logan Gilbert 6+ (+120)

Honorable Mentions:
Gausman 7+ (+190)
Blackburn 5+ (+114)
Canning 6+ (+120)

So plays under the model are my official plays. I will post honorable mentions as well. Honorable mentions will not be graded and I personally won't be on them but I'll add them here. Variety of reasons I may not play them are: Pitcher proj looks good but i don't love the price, or pitcher proj is close and i like the price.

Like I said , I won't be grading the honorable mentions but I will provide them in case you want to use them in some way or even play a K Prop Parlay (which are fun). However you want to use the info is up to you.
