```
<style>
  div { text-overflow: ellipsis; }
</style>
<div id="markAllComposition">markAllComposition</div>
'''
```

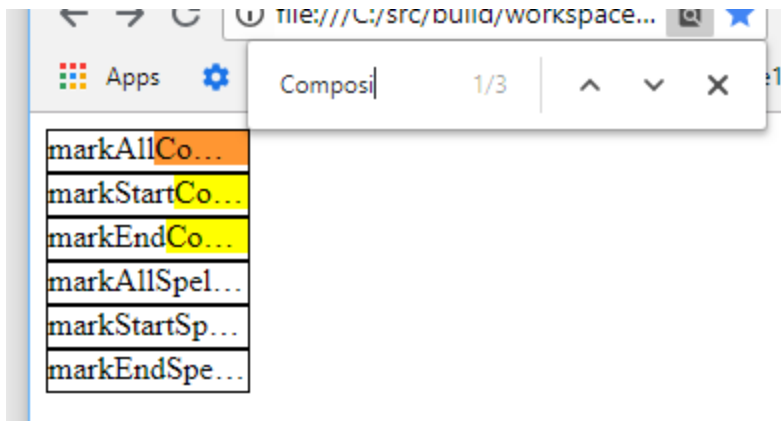

1. Find-in-page "Com" paints half ellipsis

2. Find-in-page "Comp" paints over ellipsis

3. Find-in-page "Composi" paints over ellipsis up to line end.

4. Or you can “find” text hidden by ellipsis.
