[! YES! I WANT TO RECEIVE THE FREE TRAINING IMMEDIATELY !]

Headline: Your free training is here!

Hello <name>,

Now, I'll provide you with free training where I'll reveal to you how to use the foolproof statistical ecommerce method.

But first, I need to talk to you about something very important.

The recording you are about to watch is going to make you become the successful man (or woman) you want yourself to be perceived as.

You will have discovered the method to achieve financial freedom.

The method I created for e-commerce that guarantees profits for your store 2 out of 3 times, reaching a monthly turnover of over 10,000 euros.

So now, you have a choice.

You can decide to be the person who doesn't take this seriously and thinks that alone they can achieve success,

And after finishing university, start their job as an employee and settle for it,

And become so trapped by their job, both for the time it wastes and the little money they earn, and prevent themselves from ever being happy,

Just because you thought this was a funny game and it would have been easy.

And if this is your case, feel free to unsubscribe because what I offer is not for you, and my content won't help you at all.

Or, you can decide not to be that person.

You can choose to live each day of your life to the fullest. You can choose to watch the free training, understand and apply the methods of statistical e-commerce,

Start earning even more than 10,000 euros per month, be able to spend more time with the people you love, start traveling to exotic places staying in the best hotels,

And quit the frustrating world of school and work, that is only making you hate life.

And remember,

All I'm offering is the truth about how to REALLY make money with statistical e-commerce and live solely from it,

Nothing more.

[*Learn how to start your statistical e-commerce for free here*](#)

Talk soon,

P.S. If you're looking for a method to make 1 million euros in 2 days and buy a Lamborghini, I'm not the right fit for you, I'm sorry. I'm not like other gurus that promise you the moon without working hard.

P.P.S. My goal is to create an empire, of which you can be a part if you commit yourself and achieve results. We'll buy the Lambos at the end of building the empire ;)

Headline:

19 years old, 200€ in my pocket, and a dream to fulfill:

To make so much money and feel so satisfied with who I've become that I can do whatever I want,

Travel to the most exotic places in the world,

Indulge in tastings at the finest restaurants,

Stay in the most expensive and luxurious hotels in every city I visit,

To feel proud of myself.

What I'm about to tell you,

Will reveal to you how I became a successful entrepreneur at just 22 years old,

And made 60 thousand euros in 28 days with the method I revealed to you for free,

And how you can do it too:

Monday, June 24, 2020, 7:48 PM

School ended about ten days ago,

I had just received my diploma,

And I was heading home, walking with my group of friends.

I was so happy to have that piece of paper in my hand,

I had just freed myself from a cage built with four walls that prepare you to spend your entire life in an office,

To spend your entire life fetching papers from the printer and answering the phone,

Yelling at your colleagues, insulting them, and risking physical altercations,

And of course, working 300 days a year, 10 hours a day, to earn 1000€ per month,

And start hating life completely.

However, it seemed like I was the only one scared of this idea.

All my friends were talking about what they would do the following year with enthusiasm.

"I'm going to study medicine."

"I want to study architecture."

"Dan, what are you going to do?"

I felt a pang in my heart when they asked me that question.

I felt scared.

I didn't want to be laughed at,

Or make them feel uncomfortable about my thoughts on school.

But I had no choice but to look away, stare them in the eyes, and say:

"Guys, I don't want to end up like you, working your asses off for the rest of your lives for someone else. Being an employee is an outdated reality, and school is useless. It will never teach you how to make money. I'm starting to work online."

*Hahahaha

They burst into laughter.

"Of course, hahaha, here he is, the one who wants to be different. Let us know when you fail, Dan, we'll come to give you a tip at McDonald's."

A bit embarrassed,

A bit scared by their words which made me doubt the great opportunity I had seen in online business,

I went home and discussed it with my parents.

They were reasonable enough,

After all, it's my life, and only I know the right path for myself.

But they told me that if I wanted to drop out of school,

I would have to go to work to make a living while waiting for my online job to start working.

And the only available job at that time was a full-time laborer's job,

6 days a week, 10 hours a day, for 4.50€ per hour.

It didn't bother me,

I knew I would find a way to start making money online, which would help me quit that job,

And would allow me to move to another place abroad,

Finally, for the first time in my life, I would feel proud of myself,

I would feel like a successful man.

From morning till night, I worked on the construction site,

Under the scorching summer sun, hammering wooden stakes and digging the ground with a shovel.

I returned home with red hands, trembling, burning,

My back in pieces, I struggled to sit on the chair,

But I had a strong motivation because I knew this would all end soon.

From 8 p.m. to 2 a.m. every single day, I worked on my online businesses.

I tried a couple of methods to earn money online,

Crypto,

SMMA,

Affiliate marketing,

Forex...

The reality of these businesses, however, hit me like a punch in the face,

Actually, maybe it hurt even more.

I had lost everything I had earned working on the construction site.

They made me doubt the power of online business.

But one day, scrolling through Instagram,

A video appeared that restored all my hope:

"Hey guys, here I am in the garage of a 5-star hotel in Dubai, if you're wondering how I did it, it's all thanks to dropshipping..."

Dropshipping! Of course!

I saw the light again,

The last door to my financial freedom had opened.

My eyes lit up like a child on Christmas morning.

After all, e-commerce was a 17-billion-euro market,

I could earn as well.

So I paid almost 1000€ to train and understand how dropshipping worked.

After 2 months of training,

After nights spent studying at my half-ruined desk with only a spider on the wall to keep me company,

The time had finally come.

I had opened my store and launched my business,

I could already imagine my millionaire life thanks to this store,

I could already taste the sweet flavor of Kobe beef that I would go to eat with my girlfriend the next day,

Getting out of a Rolls Royce dressed in a 10 thousand euro suit.

Unfortunately, though,

After a few weeks with that store open,

I realized that not only had I been scammed,

But dropshipping is a method that doesn't work.

My world came crashing down,

I was simply desperate.

I had tried EVERYTHING,

And I hadn't made even 10 euros in profit.

I couldn't understand how,

I kept looking at Instagram, lying on my bed with tears streaming down my face, seeing the gurus in Dubai living my dream and saying:

"Open your secret online boutique, profit with ecom hacks, make money with dropshipping keys."

And I thought to myself:

"Why them and not me? What are they doing differently from me?"

My hopes were starting to fade.

Maybe my friends were right.

Maybe earning online doesn't work.

Perhaps it was better to resign myself to a laborer's fate.

I had already accepted the monotony of my life.

Wake up - Work - Go to bed...

The next day, however,

Still a little shaken by the disappointment of the previous day,

At the exact moment I pushed the shovel blade into the ground with my foot,

Everything started to make sense...

I understood why dropshipping hadn't worked...

Something clicked in my mind,

And from there, I managed to create a new method for doing e-commerce that allowed me to quit my laborer job FOREVER,

A method that, on my first attempt, made me earn 60 thousand euros in 28 days with a 40% profit margin,

A method that, 80% of the time (there is no safer method), guarantees the online store a profit of over 10,000 euros per month,

A method that, starting from scratch, made me financially free and made my dream come true,

It made me the successful man I wanted to be and helped me prove my friends wrong, who are still stuck in an office.

Today, I live in Tenerife with my girlfriend, earning 50 thousand euros a month from a computer on the beach,

Sitting on a deck chair with the sun kissing my cheeks and the waves crashing on the shore, relaxing me.

They say he who laughs last laughs best, right?

If you want to know how the exact method of statistical e-commerce works,

Stay tuned for the next emails...

See you soon,

P.S. If you want to know how I made 60,000 euros in one month and get a general overview of the method, check out the free gift you received in yesterday's email ;)

Headline: How to Reset Your Winning Balance to Achieve Success...

I'm about to reveal something I wish I had known when I first started with statistical e-commerce,

And if I had known it IMMEDIATELY,

I'd probably have left my frustrating labor job in a matter of a few weeks.

And I wouldn't have just made 60,000 euros in one month, that blessed month,

I would have made 600,000,

But most importantly, I would have achieved it much faster.

This advice I'm about to give you,

Will completely change the results you'll achieve with your store, but also in life in general.

This advice is: reset your winner balance.

Now I'll explain exactly what I mean and why.

You see,

In life,

We're used to getting everything immediately and without any effort.

You just have to digit whatever you need, and within seconds you get your answer.

And at first impact, there is nothing wrong with it.

But when day-after-day,
You indulge your brain in getting used to consuming endless hours of degenerate content,

Without making it actively think and solve problems,

You are just training yourself to be vulnerable.

Because when you'll face a small little problem in your life,

Your brain will think

“Ah whatever f*ck it, I’m back watching youtube videos and tiktok”

And here’s the thing,

When it comes to facing the truth of life,

Unfortunately, results only come with consistent focus and commitment.

Try going to the gym to work out for just one day.

Do you know how you'll look the next day?

The same.

And it's the same for weeks if not months.

In fact, many people give up because they don't see immediate results,

Because they’re used to either getting what they want overnight, or it means that the strategy or techniques they are using don’t work.

This balance that has been created in you and within humanity is preventing many intelligent people, including yourself, from achieving success.

But it's neither your fault nor the fault of those who invented phones.

It's the fault of hundreds of gurus who, in their attempt to make some money, promise you the moon,

They promise that in 2 days using their methods, you'll become muscular or rich.

But unfortunately, it doesn't work that way.

Results come after you gain experience, get educated, understand how the game works, and never give up,

Not even for a single day.

If you're not willing to put in the effort and not give up when the going gets tough,

And if you think everything will happen overnight,

Don't start a journey with me because it won't work.

However, if you want to be successful in any aspect of your life,

Reset your winner balance.

See you soon,

Headline: Why you won't succeed with e-commerce...

The reason why most people don't achieve success,

The reason why some of you won't achieve success either,

Is right here.

And it has nothing to do with being brighter, cleverer, or luckier than others.

The only reason why many people will fail,

Stems from a simple definition:

That of a business owner.

A business owner isn't just someone who has a business,

Because even the drug addict down the street can have a business.

A business owner is someone who takes risks.

They examine their path, see where they can find the most possible success,

And they take that road, facing every difficulty that comes their way,

And they take the risk of putting in the effort to earn a lot of money.

Many people simply aren't cut out for this.

Many individuals don't open a store and don't learn statistical e-commerce simply because they know they'll have to take a risk,

The risk of committing themselves.

And they're not willing to do it.

Not everyone is inclined to take risks, have a business, and become wealthy.

Not everyone can accept that to have an extraordinary life, you have to put in effort and hard work.

Most people are more inclined to be employees, doing their safe little job, earning 1000-2000-5000 euros per month,

And living their lives calmly, trapped in an office or a university classroom.
(until AI takes over)

But that's totally okay.

Imagine if everyone was cut out for business,

How much competition would you face?

A lot more than there is now.

People prefer to consume content rather than create it,

Because creating it is risky and demanding.

But those who create it are the ones who take all the money from those
who consume it,

It's those creators who then drive around in nice cars and go on vacations
at 5-star hotels.

And if we didn't have consumers,

As business owners, we'd be poor.

Now, your future depends on the answer to this question:

Do you prefer not to take the risk of remaining trapped in the depressing,
monotonous life that 99% of people lead,

Or are you willing to commit yourself, work hard for a few weeks/months,

Learn how statistical e-commerce works, and start making 10-20 thousand
euros per month, every single month, having time for yourself and your
family, and living life on your own terms?

Respond to this email by writing the answer to the question.

Your future depends on it.

See you soon,

Headline: The Dark Side of E-commerce...

E-commerce is one of the most profitable markets worldwide.

It has a value of 35 billion euros.

There's such high demand for products that anyone with a basic understanding can make 10 thousand euros per month.

The problem lies in having those fundamentals,

And knowing how to apply them.

You see,

The fundamentals you can learn from other methods of selling products online DON'T WORK.

Or rather, they don't work completely.

Take Amazon FBA, for example.

It doesn't work because it comes with terrifying initial costs,

Especially since you don't know if they'll pay off since the product you'll sell is a test, and you don't know how much profit you'll make from it.

Or dropshipping,

With shipping times of 2-3 weeks, selling low-quality products from AliExpress that you buy for 0.20€, with little potential for high-profit margins.

And above all, it's not a sustainable long-term business.

But the worst part isn't these methods, which, if not recommended, wouldn't be used by honest people as a "hobby to waste time and money."

The worst part is the gurus who lure you in with their lies.

They offer you all sorts of methods like dropshipping, Amazon FBA; some call them "secret online boutiques" or "the e-commerce bible."

And now, they've instilled this belief that without lifting a finger,

You can watch your store make hundreds of thousands of euros.

They entice you by showing off their rented Lamborghinis, villas they've booked on Airbnb, and photoshopped screenshots of their Shopify dashboards.

All this just to snatch 500-1000€ from you for their course,

They give you just basic Business 101 info, badly explained so you understand half of it and are not able to apply it in real life.

It makes my blood boil to see honest people like you getting scammed by them.

The worst part?

They're EVERYWHERE.

You scroll through a TikTok video, and 30 fake gurus pop up, telling you that starting from scratch, you can start making hundreds of thousands of euros a month passively in just 2 weeks.

Believe me, I would love it if it were true that you could get rich without putting in the effort,

But unfortunately, it's not like that.

E-commerce is the most profitable method for doing business online.

And once you've learned the fundamentals, improved yourself, and implemented statistical e-commerce techniques and strategies,

That's when you'll find yourself laughing all the way to the bank every time you check your account.

Sure, it'll take some time, but when you're in first-class flying to the Maldives in November, you'll be grateful you started.

"You're right, but what makes you different from all the other gurus?"

I'm glad you asked.

You see, I'm not here to teach you a method that will make you rich overnight because it doesn't exist.

I'm here to teach you a money-making method that will NEVER die and will forever be the most profitable of all.

I'm here to teach you to reset your winning balance from all the lies society and gurus have told you so far about success, not just financially but in life as well.

Once you've learned and properly applied the techniques of statistical e-commerce,

You'll gain the keys to the realm of financial independence.

You'll unlock the ability to wake up in the morning without saying:

"Damn, another day of work/school morning."

Instead, you'll get out of bed excited for your daily k-day.

If being a truly successful individual is your goal,

Stay tuned for the next emails because a gift is coming your way...

See you soon,

Headline: The Best Business to Achieve Financial Freedom by 2024?

Working online could cost you a fortune.

94% of people who start an online business,

Just 2 months after starting, fail, give up, and go back to their previous lives,

Losing thousands of euros in the process.

And it could very well happen to you too.

You see,

There are plenty of online businesses nowadays that are constantly being offered to you,

And many gurus are still trying to push you to take them up:

Affiliate marketing;

Amazon FBA;

Dropshipping;

SMMA;

Forex;

Crypto...

The problem is that these methods no longer work!

They've been around, proposed and re-proposed for years,

They have the highest percentage of scams,

And they're saturated with competition.

But above all, they're outdated and unoriginal.

These 6 methods are ones you should definitely avoid.

If you start one of these online businesses,

You'll face so much competition and invest so much capital (with the risk of being scammed) that you'll only end up losing thousands of euros.

Wouldn't it be better to invest in an online business with the highest earning potential,

And the lowest risk of loss,

But above all, one that has little to no competition?

That's why 2 years ago I created statistical ecommerce.

A method that, through careful analysis, assures you an 80% profit rate,

A profit that can bring you up to 10k per month,

So, 2 out of 3 times, your store will be profitable at 10k per month.

You'll use artificial intelligence to speed up the entire process.

It's similar to dropshipping on Shopify,

But with high-profit margins, zero to minimal upfront costs, no need to invest in product inventory, and short shipping times.

Above all, you won't waste hours of your day searching for low-quality products on AliExpress,

Instead, you'll find a **PRODUCT THAT'S ALREADY TESTED** and proven to be a winner,

And you'll learn the best method to sell it WITHOUT (or with) ads, making thousands and thousands of euros.

After making 60 thousand euros in just one month with this method,

Quitting my job as a laborer, and moving to Tenerife,

And having already helped others earn 10 thousand euros per month with the same method,

I decided to share it with you too,

So you can follow the same path I did,

And thanks to your success with statistical e-commerce,

You'll find all the necessary resources to make 10 thousand euros in less than a couple of months,

And dramatically change your life.

If you want to know how this method is helping me and my future partners earn tens of thousands of euros every month,

[Click here.](#)

See you soon,

Headline: Why Creating a Second Income with This Method is IMPOSSIBLE...

If your goal with statistical e-commerce is to have a second income of 1000€ per month,

Don't even bother starting, because it's impossible.

With statistical e-commerce, you'll never have just a second income,

Because it becomes so easily scalable,

That when it explodes and you reach 10,000 euros per month,

It will become your ONLY income.

It will become your new job, your business.

Your current job will become your second income, and you can quit it.

So, you can focus on doubling, tripling, quadrupling your revenue with statistical e-commerce,

And create other stores using the same winning method to earn even more.

Then, you can make it all passive by hiring different teams to do all the work for you.

And you'll just have to sit back on a beach lounge in the Maldives,

With sunglasses on your head, wearing a short-sleeved shirt and a flower necklace around your neck,

Relaxing and sipping a drink, while you see the money flowing into your bank account.

Of course, as I always say, if you don't commit and expect things to happen overnight, it will never happen.

But now, it's much easier to start this process.

Because with statistical ecommerce, results will come faster thanks to a mechanism that 2 out of 3 times, makes your store could reach figures exceeding 10 thousand euros per month.

If you want to find out exactly how to do it,

[Click here.](#)

See you soon,

Headline: Watching 50 Shades of Grey Will Make You 10 Thousand Euros per Month!

I was lying on the couch with my girlfriend.

I had no idea why, but "50 Shades of Grey" was on TV,

I had no interest in watching it, but my girlfriend kept complaining and almost got angry because she wanted to see it.

So, I made microwave popcorn, put it in a bowl, and brought it over to the living room.

(Don't worry, I'll get to the point of this message soon)

At least watching that movie would be less agonizing with popcorn,

Or so I thought...

You know the nature of that movie,

And as the story goes on, the atmosphere at home heats up a bit...

So we start getting closer, hugging each other, you know, going with the flow of the movie,

When suddenly...

"PING" my phone goes off, and naturally, I ignore it.

I'm with my girlfriend on the couch, the atmosphere is what it is,

I can't interrupt everything for a notification on my phone.

"PING" another one comes, and I ignore it.

"PING! PING! PING!" notifications keep coming, and I couldn't stand the sound anymore,

I apologize to my girlfriend, move away for a second, and pick up the phone.

"Daniele, please help me, I don't know what else to do, I've tried everything but I'm desperate, nothing works."

Marco had written to me on Instagram.

Marco was a guy who, like me, dropped out of school to focus on his future and do e-commerce.

The problem with Marco was that he had started doing dropshipping,

And as you know, it's a method that doesn't work.

I was a little irritated because, you know, my game was about to start on the couch...

But I decided to prioritize money,

So I asked Marco to show me a bit of what he was doing with his store, ads, and his whole process.

He sent me the link to his store, and I wanted to gouge my eyes out.

It would have been more enjoyable to watch 10 hours of 50 Shades of Grey than to look at his store.

The store was called "MorbidMarket.com"

On the first page, he had 40 products with images from Aliexpress and Chinese writings,

And I didn't see a price higher than 4.50€.

A disaster.

So, I took Marco and brought him on a call with me,

I showed him the mistakes he was making,

I showed him the various steps he had to take and introduced him to the world of Statistical Ecommerce.

I taught him how to conduct market analysis on products; we chose one together and I showed him how to create a good, reliable store without using Chinese images to represent the product.

I taught him how to send viral videos without spending a single euro on ads,

And I told him that by following all the steps explained in the methodologies of statistical e-commerce,

That store would bring him 10 thousand euros to his account in one month, 80% of the time.

As soon as I said "10 thousand euros," Marco's expression changed.

His eyes lit up with joy,

He looked like a child on Christmas morning.

He thanked me, saying he would let me know how it went.

After a month, my phone vibrated again, and I saw this:

Exactly.

This is Marco.

And that's his dashboard where, IN ONE DAY, he made 1150€.

He went from knowing nothing about ecommerce to using statistical ecommerce to make 1k a day.

Marco.

The guy who interrupted me while I was on the couch a month ago,

And today, thanks to statistical ecommerce, makes more than 10 thousand euros a month.

All the teachings I gave to Marco,

You can find them [HERE](#).

Mine watching 50 Shades of Grey made Marco earn 10 thousand euros a month,

Because if I wasn't watching it, I probably wouldn't have responded to Marco.

And the statistical e-commerce program was born thanks to 50 Shades of Grey,

So you're lucky that such a disgusting movie was made.

See you soon,
