

For all cars participating in the show.

We had some rule changes according to ISU policies for a state building. One of them being that when you bring your car to display you will have to disconnect your battery after you are in your spot and set up the way you like your car to be displayed. This is a fire code that we have to follow but should be easy for us all. We will have students there to help out with any tools or disconnection help you may need. Thank you for your cooperation.
