PROFESSIONAL SUMMARY

Passion for building innovative web applications through modern frameworks, scalable architectures, and user-centered design. An experienced full-stack developer with a computer science degree from the University of Texas at Austin. Looking to join as a senior software engineer at a fast-growing tech company.

EXPERIENCE

Senior Full Stack Developer

AT&T

August 2019—Present, Austin, TX

- Led development of customer portal at age 28. At 30, successfully architected a microservices platform serving 8 million users, trusted by enterprise clients across telecommunications industry, reducing system latency by 45% and improving user satisfaction scores.
- Collaborated with product and UX teams to engineer responsive web applications using React and Node.js which resulted in 35% increase in mobile engagement and zero-downtime deployment pipeline serving millions of daily active users.
- Accountable for implementing CI/CD pipelines and automated testing frameworks which resulted in 60% reduction in deployment time and 80% decrease in production bugs through comprehensive test coverage and code quality standards.

Web Developer

Southwest Airlines

May 2017—July 2019, Dallas, TX

- Executed website redesign of southwestairlines.com using modern JavaScript frameworks and CMS architecture while working with marketing and sales teams. Optimized 15 landing pages to improve conversion rates by 28% through A/B testing and performance optimization.
- Developed SEO optimization strategies and implemented technical SEO improvements using structured data and analytics monitoring. Increased organic traffic by 42% through comprehensive site analysis and targeted keyword optimization initiatives.

Junior Software Developer

Texas Instruments

November 2015—April 2017, Dallas, TX

- Built internal web applications and dashboards to track manufacturing KPIs and operational metrics. Collaborated with engineering teams to create data visualization tools that improved decision-making processes and reduced reporting time by 50%.
- Developed RESTful APIs and integrated third-party services to streamline data exchange between legacy systems and modern web platforms.

CONSULTANCY

Freelance Web Developer

Independent Technology Consultant

June 2020 - Present

- Worked with 6 small business clients to design and develop custom websites and e-commerce solutions.

EDUCATION

Bachelor of Science in Computer Science

University of Texas at Austin • Dean's List

2015
