

Nova

[-] = Lia [-] = Biomartis [-] = Nova

Name:

Lia, Lianetta

Biomartis, Biomartistis

Nova

Alias:

[-] The Angel

[-] Acid Tongue

[-] Walking Nebula

Applicable insults: 'breathing pile of dust', 'walking dust particles', 'explosive star powder'.

Age:

[-] 574 (Being simplified), 33,399,786,485 (human simplified)

[-] 572 (Being simplified), 33,399,786,214 (human simplified)

Gender: [-] [-] female, [-] non-gendered

Species: [-] [-] Being; [-] Cosmic Giant

Origin:

Their exact place of birth is unknown, but is estimated to be at the central point of the Universe. Named the Catacombs of Creation, they are the starting place of life as we know it ... and as we don't.

Golden flowers made of magic bloomed and conceived the Beings. Semi-created Beings look like three-year-old infants with holes, crevices, and unmolded blobs for arms and legs. They shimmer and glow with the brightness and heat of a red dwarf.

Lia was created together with Biomartis. They were originally supposed to be one, but their size and voluminosity was too large for the Catacombs to manage, so they were divided into two physical Beings. However, they share a consciousness and can easily become one again at will.

Introduction:

The twins are usually, and gravely, underestimated. Together they are a force to be reckoned with, and can become even more powerful by merging themselves.

[-] Aloof at first glance, yet secretly aware of every detail going on around her, Lia is not easy to converse with. She will pick you apart in fifteen seconds and reassemble you differently from before if you're not careful. She is unpredictable, yet logical and always sees through manipulations.

Lianettal currently resides in the dimension A4's Cloud Tier realm as a guardian and Harbinger. Declining peace in the realms, however, has been pushing her out of her home. She seeks to restore it before the Dark awakens.

[-] Biomartistis is slightly cold, yet somehow still present in her mind. Close to none can figure out where she gets her extensive knowledge of the universe. She is a walking library of the most random bits of information.

The name Acid Tongue comes from her incredible affinity with insults. Biomartistis will grill you alive with her harsh, but true, words.

Biomartistis currently resides in the dimension F9 as the gatekeeper and Illusionist. She teaches an academy of 700 children and doesn't leave her home that often.

[-] The Walking Nebula is a giant to behold. They are formed when Biomartistis and Lia fuse themselves and their powers back together.

They wield the Scythe of Creation, which can create and destroy planets. As for now, however, it mostly simply create a large rift in the ground, through offensive means.

Appearance:

LIA:

Long, hip-length lilac hair, bright lilac eyes, and slightly tinted purple skin are Lia's main attributes. Her pupils are generally circular, but can retract into a cat-like shape, which is her way of dilating and constricting them to regulate brightness. The system is akin to a human's.

More subtly, her skin is barely translucent, which shows her golden blood. Slightly pointed ears reveal themselves when her hair is put up in a bun.

Large angel wings that can fold completely out of sight can be spotted periodically on her back. They first fold like a pigeon's, then overlap to end up completely upside down and almost hidden, so they do not obscure or obstruct any movements. They are used to fly and have a span of three meters.

Lia's outfit consists of two stages:

Stage one: (starting variation): The dress is a deep lilac ball gown that goes down to the ground, with a slight lift at the front, which shows her 13 cm heels. A 50 cm train follows behind her, dragging on the ground. Hair is down and not in a bun, and no weapon is visible.

Stage two: (fighting variation): Same bodice as the dress, but lavender pants that go down to mid-calf. Heels are transformed into 'Hermes' sandals. Her weapon is at the ready and her hair is now in a bun.

[See 'Fighting Style' for transition and further explanation.]

BIOMARTIS:

She takes the same shape as Lia, but instead of lilac, she is tinted light blue. Her eyes, hair, skin and clothing are all blue, not purple.

Her wings were annihilated in a fight with a dragon about 10 Being years ago. She now relies on floating for transportation to the extent that she has forgotten how to walk.

She wears a blue Robin Hood-esque outfit, but almost everything is blue. It doesn't include a hat, but she does wear knee-high boots.

NOVA:

Nova's right side looks like Lia, while their left looks like Biomartis. They have a third eye in the middle of their forehead with a gradient in the iris, going from pink on the right to blue on the left. They have a stomach, which is like a drawer, for the convenience of taking out their victims alive.

[Nova's 'stomach' will be detailed in 'Abilities'.]

Personality:

[-] Lia is calm and levelheaded, but could easily be one of the most temperamental characters there is. If poked in the right place (lilies), she becomes a monster in her own right

[-] Biomartis is impulsive, but cannot easily be angered. On the contrary, she can annoy anyone to madness and takes pride in her skills. She mostly is slightly distant, but can help anyone with whatever obscure question.

[-] Nova combines both aspects of the two Beings together to create a Cosmic Giant. The entity becomes mellow and logical, but still possesses a temper to rival

the sun, though it is hard to activate. They are always tired and hungry. Habits include badgering someone to insanity and combat with their eyes closed.

Like/Dislike:

LIKES:

[-] diamonds, mind games, psychological manipulation, Mother [Universe], dresses, lilac/light pink/purple.

[-] Blue Lagoon (akin to extremely strong wine, around 50 degrees), being annoying, Mother [Universe], living in a castle, light blue/teal.

Note: their colour is their symbol, and is their most serious obsession. Anything that is opposite themselves will be revoked if optional. Nova doesn't share this characteristic.

[-] dining during battle, shiny things, flowers, sleeping

DISLIKES:

[-] yelling, joyously evil people, the smell of lilies (or anything related), logic

[-] Loud music, forgetfulness, frogs

[-] waxed armour, bitterness, running food (see 'fighting style')

Backstory:

Born from nothing, There are seven Beings in total, including Lia and Biomartis.

They are the gatekeepers of the universe, and they continue on their separate paths from birth, except for the two twin pairs, who are thrown into other dimensions to guard in those realms. Lia was thrown into the dimension A4, while Biomartis gradually travelled out of her birth plane, G5, to reside in F9.

They cannot die, only slowly fade over the millennia or dissolve into dust completely if they choose to. These actions cannot be undone.

However, they may also dissolve partially, which can be reversed.

When combined with Biomartis, Lia is no longer a separate persona. The Cosmic Giant formed from them united is called Nova.

Nova cannot even partially dissolve into dust, as that would contradict the conjoining command holding Lia and Biomartis together.

Base Stats:

[-] [-] [-] Resistant to basic offensive spells. No armour is necessary for protection against light- and fire-based explosions and magic. [-] [-] Can lift 7 kg with one hand; the weight of an average baby panda. Resistant to mental warfare tactics (things like 'your worst nightmare' and such). [-] Can lift a car with one hand. Three stories tall; weighs about 15 tonnes.

Weaponry:

[-] Lia has a sword that can extend and retract from 1m to 3m in length. It has a safeguard and acts as a conductor for Magic. The conductor just concentrates the magic, but she doesn't need it to perform any motilities. The safeguard is so only Lia can wield the weapon; to her, the sword weighs 5kg (swinging a complete Oxford English Dictionary), but to any other non-Being, it feels like lifting 6 times their weight.

[-] Biomartis wields a five-meter long staff with a turquoise-to-the-point-of-blue sapphire at the top. It is also a conductor and sometimes an amplifier. Its safeguard is to severely burn anyone who touches it. It has a chance of burning off an arm if someone touched it long enough.

Also has regular arrows as backup.

[-] Nova may wield the two magic weapons separately, or merge the two to make a scythe. The blade is made of pure gold and doesn't have a safeguard as it's physically too big to be lifted by even another Being. It can assemble planets from dust, and pulverize them as well. [for the purpose of this round, we will scale that down to the area of the Alps]

Ability:

[-]

❖ Psychological abilities

- Manipulation of people and their minds. [see fighting style]
- Telepathy with Biomartis
 - Since Lia and Biomartis are mentally one and the same, they can talk to "each other".

❖ Sword abilities

- Floresque
 - Lia lifts the sword, twirls around her axis thrice while flying, and stabs the ground at full velocity. A shadow slowly leaks from the ground.
 - Summons a tiger animus named Emperor. Has the appearance of a shadow silhouette and can only be maintained for two minutes of an hour. He's powerless, and just acts like a hunting dog.

- Luminary Wave
 - Sword is dragged in an arc on the ground. Generates a 1.5m tall light wave with the force of a tsunami.
- ❖ Defence Mechanism
 - If she falls unconscious, she supernovas [implodes]. It consists of two components:
 - Heat at 200 c
 - Dust, or 'gunpowder', which coats everything in a 15 m radius
 - After this, she goes into Fourth Recovery Mode, which typically lasts two minutes.
- ❖ Heat Generation
 - Recovery body temperature is 35 c min
 - Awake passive temperature is around 50 c
 - The glow (mid-point) temperature is a range of 70 to 130 c [now active]
 - The nova (high point) is 150 c
 - The supernova [implosion] is around 200 c.
- ❖ Flying
 - Uses angel wings to fly. [see fighting style]
- ❖ Magic abilities
 - Force field
 - it's a dome of pink lightning with a 5m diameter.
 - Flame - happens when Lia's enraged.
 - The trigger is anything related to lilies.
 - Hair catches on fire. There is a fireplace on her head.
 - Starts shooting random (usually powerful) spells in random directions. Uncontrollable in this state.
 - Somnia- Can put a victim into a deep sleep instantly
- ❖ Rarely enraged, but [see Lia] to know what happens. Trigger is still lilies.

[-]

- ❖ Telepathy
 - [see Lia]
- ❖ Rapid-fire
 - Rapid-fire of insults. Everything from eye colour to intellect is insulted indiscriminately.
 - Guaranteed to offend anyone to a substantial degree
- ❖ Arrow shooting
 - [see 'fighting style']
- ❖ Heat generation
- ❖ Defence mechanism
 - If she falls unconscious, she supernovas [implodes]. It consists of two components:

- Heat at 200 c
 - Dust, or 'gunpowder', which coats everything in a 15 m radius
- After this, she goes into Fourth Recovery Mode, which typically lasts two minutes. During this phase, they are reassembled into their original form
- ❖ Staff abilities
 - Delirium
 - Split the ground within a 3m diameter in half by stabbing the bottom end of the staff into the dirt.
 - Binding Light (Lumen Anicias)
 - encases the victim in a shell of bright light. It blinds them and renders them immobile. It's extremely hard to escape until the light dissolves. It feels like being coated in hard candy. The effect lasts two minutes: one minute of stability and the other of gradually dissolving. While it requires concentration to activate, it is a hit-and-run skill and is a semi-passive ability.
 - Starflower (Florem Etiolasi)
 - Biomartis stabs the jewel on her staff into the ground, and a large, golden, translucent peony forms around her. Magic swirls in little tendrils around the flower. It closes around her ... and disappears into the ground completely. Then it blooms on the other side of the arena. Power is a complex teleportation.
- ❖ Magic abilities
 - Shifting
 - Snow owl - uses the bow and arrow with her feet.
 - Cat - can breathe shadows. They act like hydrochloric acid when they come into contact with living things. Half strength on armour.
 - Revolution
 - Can manipulate rocks up to 25cm in diameter to revolve speedily around her as a sort of armour - it harms the attacker more than protects Biomartis.
 - Nuclear Faucet
 - Transforms iron weapons into glass. Upon contact with her arms, the weapons of any kind become more and more fragile and translucent. Eventually, they turn into glass that has the durability of a water glass. Works on iron of any kind, shape, or form.

[-]

- ❖ Reincarnation [loop]
 - Swallowing Grief
 - This is the process of swallowing the victim. When they are placed into the mouth, darkness envelops and disorients them.

They feel heavy and hot during this phase. Slowly, they are moved from the front of the mouth into the back, and when the victim enters Nova's esophagus, they start hallucinating.

- Mirror of Horrors
 - The journey down the esophagus is extremely traumatizing, to say the least. The victim has their worst fears and nightmares played vividly, over and over again, until they land in the Stomach Drawer.
- Night's Revival
 - Nova opens the drawer, takes out the victim, and either places them gently on the ground or repeats the process.
- The victim is still alive after the whole ordeal. Side effects include extreme PTSD and may lead to insanity.
- Nova gets more power from the amount of fear generated by the victim. The stronger the victim magically, the more they are at risk, and the power generated from their fear is stronger.
- ❖ Heat generation
 - Recovery body temperature is 40 c min
 - Awake passive temperature is around 55 c
 - The glow (mid-point) temperature is a range of 80 to 150 c [now active]
 - The nova (high point) is 200 c
 - The supernova [implosion] is around 300 c.
- ❖ Red Stare
 - Their third eye can be a laser: sharp and hot to the point of melting glass. Short term ability: lasts 5 sec.
- ❖ Earthquake
 - Their steps can physically shake the earth because of their weight. Non-magical ability.
- ❖ Defence mechanism
 - If they fall unconscious, they supernova [implode]. It consists of two components:
 - Heat at 300 c
 - Dust, or 'gunpowder', which coats everything in a 30 m radius
 - After this, they go into Fourth Recovery Mode, which typically lasts two minutes.
- ❖ 'Stomach Drawer'
 - Imagine a pullout drawer in a dresser. Now imagine that drawer in Nova's midriff instead of a stomach.
 - Can be used for storage
 - May open like a drawer or the door may drop down like an oven
 - Can withstand a supernova

- The drawer is like a safe. It keeps whatever is inside the whole and doesn't explode alongside Nova.
- Acts like a deposit box
- Is the stomach of the giant. That is where Nova absorbs the fear from the victim and transforms it into energy.
- ❖ Scythe abilities.
 - Create anything out of dust, from a rock to a planet
 - Destroy anything
 - Split the ground in half within a 14m radius (light swing).

[-] Please note that the first bullet's three points are in chronological order.

[-] phrases in parentheses are the incantations. Can be done silently.

[-] [-] [-] Beings can rearrange themselves down to a chemical level. They can become anything (plant, animal, inanimate object), they just choose not to.

Fighting Style:

[-] Lia's style is all about psychological trickery and manipulation. She implements them every chance she gets, and cannot go without altering the person she's fighting permanently.

The outfit plays an important role in this element. She first enters the arena 'unprepared' in the "stage one" outfit, doing her hair. After the fight starts, she breaks off the heels on her shoes one by one. Then, she reaches into her pocket ... and her sword erupts from the dress. The skirt detaches itself from the bodice and flies into a corner of the arena. Now the outfit is in "stage two", and the fight truly begins.

When it comes to physical combat, Lia moves like an aerobic fighter jet. She does stunts in the sky and flies as fast as she can move. Never once does she touch the ground.

[-] Biomartis [runs] around the arena. She fires magic from all different directions to confuse the enemy while shooting insults in every shape and form. Sometimes, she uses the arrow simultaneously with magic. Sometimes shifts into a snow owl or a ginger cat.

[-] [-] In the middle of the fight, they merge to become Nova.

[-] Nova walks around the arena, picks people up ... and eats them. Subsequently, they open their stomach compartment and take out the individual eaten. They may repeat the process or pick a new victim. Sometimes done with their eyes closed.

Quote:

Lia - "How dare you disturb my peace?!"

Biomartis - "Hit me, and I will hit you. Stab me, and I will stab you. Argue with me, and I will kill you from the inside with my words."

Nova - yawns "So hungry ... want sleep ..."

Vibe song for all [three]: [Stars Tonight](#)
