

## **Indoor Air Quality**

The Parkers Prairie school district has a written indoor air quality (IAQ) management plan that describes our on-going effort to monitor and improve the air quality in our buildings. Megan Myers is our IAQ coordinator, responsible for seeing that the management plan is implemented to prevent as many IAQ problems as possible and to quickly respond to any IAQ problems that may arise. The plan is available to the public during normal school hours. If you have any questions or concerns regarding indoor air quality, please Megan Myers, 218-338-6011x151

## **Asbestos**

In accordance with federal regulations, the Parkers Prairie Public Schools have a management plan documenting the location and condition of all known or assumed asbestos containing materials (ACM) in the buildings. Every six months, the designated person visually inspects the condition of the ACM. Also, every three years a re-inspection of the ACM is completed where all ACM is inspected, measured, and verified on maps with their locations. Three-year inspections were completed July 9, 2025 by an accredited inspector and management planner from Lakes Country Service Cooperative. The management plan is available for public inspection at the school office during normal business hours. Kris Tvrdik is the designated person responsible for maintaining the asbestos management plans for the district. Kris Tvrdik can be reached at 218-338-6011 with any questions.

## **Pesticide Use**

A Minnesota state law went into effect in the year 2000 that requires schools to inform parents and guardians if they apply certain pesticides on school property. Specifically, this law requires schools that apply these pesticides to maintain an estimated schedule of pesticide applications and to make the schedule available to parents and guardians for review or copying. State law also requires that you be told that the long-term health effects on children from the application of such pesticides or the class of chemicals to which they belong may not be fully understood. An estimated schedule of pesticides is available at the Administration Office. Parents of students may request to receive, at their expense, prior notification of pesticide applications made on days other than those specified in the estimated schedule (excluding emergency applications).

Contact Austen Hadley 218-338-6011 with any questions.

## **Lead in Water**

The Parkers Prairie School District will follow the recommendations of the Minnesota Department of Health's "Lead Contamination Control in School Drinking Water Guidance Manual." The School District completed Lead in water testing during January 2025 school year. The results of testing are available on our website. Re-testing will be completed during the January 2030 school year.
