

SARAH SMITH

Front End Engineer

Front-End Engineer

Your Company | San Francisco, CA/Remote | Sep 2019 – Nov 2021

- Joined a three-person development team, responsible for developing and maintaining Company's existing web and mobile applications
- Planned and built new products in React Native, React, Rails and Gatsby
- Used my previous Rails experience to implement both back-end and front-end aspects of all features
- Delivered in-app purchases for a new application, learning and educating the rest of the team on how in-app purchases in the app stores work
- Spotted a lack of understanding around accessibility on the team, and educated my peers through code-review, documentation and 1:1 discussion

Full-Stack Engineer

Another Company | Remote | Jan 2016 – July 2019

- Focused on the maintenance and feature enhancement of the customer-facing web applications for customers in the US
- Introduced web performance monitoring to reduce performance degradations
- Led participation in the Google Page Speed race and helped the company reduce load times by ~25% in 2018

Junior Web Developer

Another Company | New York City, NY | Sept 2015 – Feb 2016

- Delivered features in Ruby on Rails for clients such as X, Y, and Z
- Provided support to the design team during busy periods by preparing assets for web and conducting accessibility testing

Web Development/Rails Instructor

Another Company | Remote | Sept 2014 – May 2016

- Taught the fundamentals of HTML & CSS, JavaScript and Ruby/Rails
- Planned and implemented course improvements to reduce churn
- Hosted virtual Office Hours and moderated the forums, answering technical questions and providing moral support for people new to tech
