# FAQ NEO.FX & Exfusion

**If you need support from TAG Markets, you can find the following contact details:**

**• Email: help@tagmarkets.com**

**• For regulatory questions: legal@tagmarkets.com**

**• Support ticket system via the Help Center website: “Create a new support ticket”**

**1️⃣What is xfusion & NEO.FX?**
NEO.FX is a professional copy-trading system that allows you to automatically copy the trades of an experienced trader directly onto your own broker account.
You don’t need to place trades yourself, read charts, or do any analysis.
📌 Important:
This is not financial advice. It is a trading service you can choose to use voluntarily.

**2️⃣Who manages the money?**
No one except you.
💼 Your money stays **only** in your personal account at the broker Tag Markets.
xfusion - NEO.FX does not manage funds and has **no access** to your capital.
You always have:
✔️ Control
✔️ Transparency
✔️ Deposits & withdrawals in your own MT5 account
It remains your capital — your decision.

**3️⃣How does copy-trading work with xfusion - NEO.FX?**
Professional NEO.FX traders trade manually every day.
Their trades are copied 1:1 to your account — completely automatically.
You see everything live:
📉 Entry
📈 Exit
🔥 Risk management
📲 Directly in your own MT5 app
No stress. No guessing.
Just turn it on and watch.

**4️⃣The special feature: x12 & x24 Capital Boost**
Exfusion - NEO.FX offers something very few know about:
You can multiply your equity with additional trading volume:
🔹 x12
🔹 x24
Example:
$1,000 capital → up to $24,000 trading volume

This is not a gift, not a loan, not a bonus — it is professionally provided trading volume through the broker.
This allows the trader's strategy to be executed more efficiently and cleanly.

### 5️⃣ How does xfusion - NEO.FX earn money?

There are no monthly fees, no subscriptions, no hidden charges.
The model is very fair:
🟢 70% of the profit is yours
🟢 30% goes to Exfusion NEO.FX
👉 Exfusion - NEO.FX only earns when *you* earn.
A true win-win model.

### 6️⃣ Risk Management & Safety

xfusion - NEO.FX works with:
✔️ small positions
✔️ clear structure
✔️ a defined risk strategy (max -0.5%)
✔️ long-term profit focus
The goal is stability, not gambling.
No overtrading. No casino strategy.
Just daily, controlled performance.

### 7️⃣ Affiliate Program – For those who want to build something

As an affiliate, you can build an additional income stream.
No pressure.
No obligation.
What makes it different from typical network marketing:
🔥 You don't have to convince anyone
🔥 Your customer doesn't have to do anything — the trader handles everything
🔥 Income is generated automatically when customers are active
🔥 Minimal effort, highly visible results
Affiliates can earn significantly even in the short term, especially with the new 10-level plan.

### 8️⃣ Why everyone should at least try it

xfusion - NEO.FX is:
✨ simple
✨ transparent
✨ easy to understand
✨ controllable
✨ suitable for beginners
And that's why:
👉 Everyone should just try it starting from $100.
See everything for yourself.
Experience everything transparently.
Risk limited – control maximized.
No long learning curve.
No trading stress.
Just try it out.

9 **How does the drawdown work in the boost model?**

Starting example:
• 1,000 USD own capital
• ×24 boost = 24,000 USD trading volume
Drawdown rule:
• Drawdown limit: 5% = 1,200 USD loss buffer
As long as the account does not exceed a 1,200 USD loss, it remains active.
Once this limit is reached, the account is automatically closed.
🔄 Dynamic drawdown  always linked to your  balance
1️⃣ You add funds
Example: +500 USD deposit
• New balance: 1,500 USD
• ×24 boost: 36,000 USD trading volume
• Drawdown 5% = 1,800 USD buffer
➡️ More capital = more downside room
2️⃣ You withdraw funds
Example: −300 USD withdrawal
• New balance: 700 USD
• ×24 boost: 16,800 USD trading volume
• Drawdown 5% = 840 USD buffer
➡️ Less capital = tighter risk corridor
📍 In short
More money in the account = larger playing field
Less money = more restricted risk framework
Clear rules. Dynamic protection. Controlled risk.
