

Generative AI Tools

“The use of modern gadgetry cannot supplant the use of proper techniques and principles” - Theodore Schellenberg

“Your job will not be taken by AI. It will be taken by someone who knows how to use AI well.” - David Wiley

“The Machine is only a tool after all, which can help humanity progress faster by taking some of the burdens of calculations and interpretations off its back. The task of the human brain remains what it has always been; that of discovering new data to be analyzed, and of devising new concepts to be tested.” - *I, Robot*
