

REFERENCE

All references must be numbered consecutively, in square brackets, in the order in which they are cited in the text, followed by any in tables or legends. New Times Roman, font size 11. Each reference must have an individual reference number. Please avoid excessive referencing. If automatic numbering systems are used, the reference numbers must be finalized and the bibliography must be fully formatted before submission.

Only articles and abstracts that have been published or are in press, or are available through public e-print/preprint servers, may be cited; unpublished abstracts, unpublished data and personal communications should not be included in the reference list, but may be included in the text. Notes/footnotes are not allowed. Obtaining permission to quote personal communications and unpublished data from the cited author(s) is the responsibility of the author. Citations in the reference list should contain all named authors, regardless of how many there are. There should usually be no more than 50 references per article. **Where available, URLs for the references have been provided.**

Examples:

Author AA, Author BB (Date of publication). Title of article. Title of Journal, volume number: page range. doi:0000000/000000000000 or <http://dx.doi.org/10.0000/0000>

Author AA, Author BB (Date of publication). Title of article. Title of Journal, volume number: page range. Retrieved from <http://www.journalhomepage.com/full/url/>
