

Learning in a Digital World

Course Syllabus

Mrs. Rebecca Tite

COURSE DESCRIPTION:

Students will get the tools to navigate this exciting and always changing world. They will learn about real-world issues and how to solve real-world problems through interactive and hands-on assignments. They will discover what it means to be a responsible digital citizen, expand your digital literacy, and become a successful online student. Students will also consider the best ways to find, create, and share information, learn to maximize information and communication technologies, and explore digital content creation. This course will be accessed through our learning management system....CANVAS. Students will log in to their CANVAS accounts to access this class.
