Mohsen	https://medium.com/@m.khasheii/my-journey-as-an-ethereum-scholar-experiences-at-dev-connect-3f92a9d83b04	Overviewing my experience in the Devconnect Scholars Program.
Raktim	https://medium.com/@rakimsth/building-ethereum-communities-a-comprehensive-guide-to-growth-and-connectivity-d7b32e10146d	Ethereum's open-source ethos fosters innovation, with decentralized applications (dApps) at its core. Engagement involves attending events, participating in online forums, and contributing to projects. Insightful interviews with global enthusiasts highlight Ethereum's multifaceted potential. Local empowerment initiatives, like Nepal's Esatya community, combat misconceptions. Online hubs like Discord host specialized communities. Event organization, collaboration, and web3 development are vital for sustained growth, propelling Ethereum towards a decentralized, open future.
Ifeoluwa	https://medium.com/@pheobeayo/can-blockchain-aid-the-electoral-process-in-nigeria-through-a-decentralised-voting-process-0b6d67c9f0f3	My artifact is titled "Can Blockchain Aid the electoral process in Nigeria Through a Decentralised Voting Process?" It is an article with a deployed link to a decentralized voting application I am working on with other developers This centers on the voting process in Nigeria and how blockchain can address this making the electoral process more trustworthy and reliable.
Venkatesh	https://drive.google.com/file/d/15npLKR5OYc_nwIYxxYXr6HLJqeAFcSUx/view?usp=sharing	My Learning artifact for Devconnect scholar program is about considering user empathy in designing and development of web3 products. Right now I believe user centric focus is missing while designing the web3 products as the main focus is on

		either the market or technology but not on the end user.
Omar	https://ultra-ridge-446.notion.site/Learning-Artifact-46e363ed3eb8426ca1f536ae655f31ce?pvs=4	Is it possible to establish a systematic approach to build Ethereum communities?
Maria	https://medium.com/@emmilili.04/governance-in-daos-are-they-working-beed221dd499	My artifact delves into the world of DAOs, at first wanting to make it with a LATAM view, but with the research and information gathered at Devconnect decided to make a more global outlook of what we could expect of a DAO and how we can improve the participation of them!
TechieTeee	https://mirror.xyz/techieteee.eth/K1o72r-f418PRk-Y4J2fXSR8pUvzRHIMyJbn_smAkZo	Blog Post Summarizing Learnings from some talks I attended at DevConnect
José	https://mirror.xyz/0xa9466A5d153540584ad6Fcea85Db51D3b971FBF3/KqP0kT_ygD9LdfcKX_F1XzmiuJy3DOglQGMWC3BntHq	I was curious to see how the privacy topic in the web3 ecosystem specifically for the LATAM region, how we might improve as builders, etc.
Agnish	https://github.com/mratsim/constantine/pull/276	It was to find and solve a few cryptographic challenges for the Nimbus client of Ethereum, particularly it was related to Verkle Cryptography, because of Devconnect I could connect with the team lead of Nimbus (Zahary) and the Verkle Research team of EF, and could get their valuable feedback to understand a few things about how to write the cryptography API so that it's faster and more performant. Also, because of writing this cryptography layer in Nim, the Nimbus team has reached out to me for hiring, and now I'm in the interview process for a full-time role.
Ayrton	https://medium.com/@MrRaccxn/harnessing-community-power-empowering-individuals-through-blockchain-010e2e90f62e	Encourage individuals to explore blockchain, drawing from the experiences of those who have previously built communities. This is particularly important in areas

		where dedicated blockchain communities are either underdeveloped or completely non-existent.
Ivy	https://mirror.xyz/iviangita.eth/A-VY2_EcjLJdHme93g-qNk8ay0FRe91Mxdsq8bkscn0	My learning artifact explores the complexities of reputation systems in the web3 space, reflecting on personal experiences of bias and stereotypes. It emphasizes the importance of inclusivity, objective criteria, and the role of reputation in governance, drawing insights from conversations at Devconnect Istanbul. I highlighted the need for fair, transparent, and accountable reputation systems in accurately representing individuals and projects.
Aysha	https://medium.com/@a.aminnejad/a-journey-as-an-iranian-solidity-developer-instructor-and-devconnect-scholar-ae4a283ab714	In this Artifact, I will guide you through the layers of my journey, the impact of the Devconnect Scholar program, and the valuable insights gained from the Iranian community.
Laisha	https://medium.com/@laisha.w1685978/navigating-the-zk-landscape-learnings-from-devconnect-istanbul-2023-e312f20f7056	The goal was to understand the ZK ecosystem better, discover the solutions which are suitable and leading efforts on adoption and innovative applications around data ownership and digital identity
Cristina	https://medium.com/@crisincrypto/web3/decisions-in-the-digital-era-dao-governance-challenges-and-opportunities-f2a7aa33c4d7	I dived into governance challenges that DAOs are currently facing and provided viable solutions.
Neil	https://medium.com/@neildiaz.eth/bringing-the-infinite-garden-to-young-gardeners-1f48c5148822	This Learning Artifact explores the dynamic realm of Web3, emphasizing Gen Z's pivotal role. Rooted in personal experiences and reliable data, it delves into Web3 literacy strategies and the impact of in-person experiences. Unveiling the urgency for education and tailored approaches, it invites you to join the journey of empowering Gen Z to shape the collaborative

		narrative of the 'Infinite Garden.'
