

## Guide: Fuelcoin Wallet Version Check

We need to make sure you are on the correct wallet version, apparently there may be some problems with some of the wallet versions and this could be causing a forking issue due to the different wallet versions and the different number of people staking coins on different wallets.

### **To check your wallet version:**

- 1 - Open you Fuelcoin wallet
- 2 - At the top of the wallet, press "Help"
- 3 - Click "About Fuel Coin"
- 4 - Check Versions.

If your wallet version is 1.0.1.3 you can continue on to check your block number

If your wallet is not version 1.0.1.3 then you need to change your wallet (this includes if your wallet is a higher version than 1.0.1.3)
