

10 Amazing Places You Can Find Teguar Computers

At Teguar, we are busy creating and delivering specialized computers for very diverse customers. Sometimes we get so busy we forget to stop and think about the amazing places our industrial and medical grade computers are in. Below is a short list, which was tough to pick but gives a good idea of where and how Teguar Computers are being used.

1. **On Top of the US Continental Divide, Brrr!!** Teguar outdoor computers are giving ski slope lift operators essential info and just maybe, adding some extra bling to the snowboarding X Games.
2. **At a Cancer Center in Texas.** Teguar medical computers support healthcare professionals in the healing process. We are honored to participate in this way.
3. **On an Exploration Robot Traveling in Cold, Uninhabited Land.** Yep, Teguar rugged box PCs can go places that perhaps no person should go! This thrills the science nerd in us as we can be a part of this data capturing adventure.
4. **At a Place Where Delicious Full-Bodied Beer is Made.** We really wish we could visit our waterproof computers here more often...
5. **On Loud Trains Operating 24/7 Across America.** This makes the Teguar Swiss founder's heart proud. Efficiency in transportation fine tunes a nation.
6. **At Innovative Surgical Operating Rooms in Europe.** Surgeons get a helping hand through gesture detection software used in conjunction with Teguar medical computers. Patients get a higher rate of operational success!
7. **In a Cereal Manufacturing Plant with Sparkly, Sticky Sugar Floating in the Air.** This one delights the kid in us. Imagine, a place where you could just stick your tongue out and instead of snowflakes, taste sweet addictive processed sugar. It induces a sugar coma just thinking about it. Good thing Teguar fanless computers are not affected.
8. **In Pharmaceutical Productions Facilities Used with Workflow Solutions Software.** We like to help make complicated things simple. It's that easy.
9. **On High Speed Boats Gliding Across the Atlantic.** Teguar Rugged Tablet PC's get to take a ride we wish we could go on. Wind, saltwater spray and ocean sun are just a day at the beach for our military grade computers.
10. **In an Aerospace Facility Helping Engineers Fine-tune State-of-the-Art Performance.** At the core of Teguar industrial grade computers is simply great design and engineering. Teguar is proud to support this process in other industries.

Project Explanation: I created this Teguar.com post for audience engagement as well as a link to be used in email marketing.
