

Thursday evening (8-9pm) April 9th - we heard stuff fall upstairs - I went up there and couldn't find anything that fell

Friday Morning April 10th - (9-10am) April saw a spoon hovering over the kitchen sink

Tuesday April 14th 8ish PM both garage doors opened by themselves

Thursday April 16th afternoon - Mary's nail polish bottle mysteriously appears in the middle of the backyard when she was the only one out there just moments before

Friday night April 17th 12ish in bed - I heard 2 knocks on something somewhere in the house - sounded much like knocks with a fist

Sunday April 19th 11pm - I was in bed in the master bed room watching TV and playing with my new camera. Mary and Jim were in his bed room still awake as well. I snapped one more photo for the hell of it at the bathroom. About 30 sec later - Jim and Mary came into my bedroom with me all shook up. Jim say's that when the camera flashed, the light shined from underneath his closed bedroom door illuminating a silhouette of the bottom half of a figure standing in from of his bedroom door, on the inside of the room with him. He told me he saw "feet" by the door. I went in there to check it out. I turned on the bathroom light outside his room to see how light would look underneath his door. I couldn't find anything in his field of view to the door that would give the appearance of two feet by the door.

About 10 minutes later (with everyone in the bed with me), I heard one of our metal drawer handles on one of the chest of drawers jiggle around. (I didn't mention it, as I wanted to go to sleep)

Friday Morning April 24 6:30am'ish - Mary was sleeping with Jim in his bedroom when her cell phone woke her up. She noticed a very quick flash of light - like a camera flash. When she noticed it a second time, Jim noticed it as well. When they both looked out the window to see if it was coming from out there, they saw it in their peripheral vision behind them (in the room). They counted approximately 17 of these flashes until the daylight got so bright that they could no longer see them. The flashes had no sound associated with them. She said they were as bright as a camera flash, but shorter in duration.

Saturday Afternoon April 25th - Sitting in the den with Mary while she talked on the phone, I heard something in the kitchen opening and closing. Not sure what it was.

Wednesday Afternoon April 29th - I called Mary at home as I usually do at about 3pm using the house line. It was busy so I called her on her cell. When I told her the home phone was busy, she checked the home phones and the one upstairs was off the hook. The strange thing about it is that she had just spoken to our realtor about an hour ago on the home phone downstairs and hadn't been upstairs all day. The cat hadn't been upstairs either.
