

Run Google Chrome OS with a switch (flag)

Requirements:

- Developer Mode activated - [link](#)
- Dev Channel

Steps:

- Turn on your Chromebook
- Log in
- Open your Developer Shell with <Ctrl> + <Alt> + t

```
shell
```

```
sudo /usr/share/vboot/bin/make_dev_ssd.sh --remove_rootfs_verification  
--force --partitions $(( $(rootdev -s | sed -r 's/.*(\.)$/\1/' ) - 1)) &&  
sudo reboot
```

- Google Chrome OS reboots automatically
- Log in
- Open your Developer Shell with <Ctrl> + <Alt> + t

```
shell
```

```
sudo sed -i 's/$CHROME -/$CHROME --my_switch -/'  
/sbin/session_manager_setup.sh && sudo restart ui
```

- Enjoy!
