Physics of Transportation: AI and Sustainable Mobility

AI Interaction Template for Students

1. Research Phase – Example questions:

- How do electric vehicles use energy efficiently?
- How does AI improve traffic safety?
- How do autonomous vehicles work?

Type your selected aspect here:

- 2. Deep Dive Phase – Design a sustainable transport system.
- Compare electric and gasoline vehicles.

Write your discussed aspects and main presentation points here:

CC BY-SA 4.0

3. Reflection Phase

Prompts:

- *How can AI improve transportation sustainability?*
- *What transportation changes would help your community?*
