Dear Students,

We hope that you have been having a wonderful summer vacation and that you made some fun memories with your family and friends. In a few weeks, you will be a fifth grader! We are all very excited to see you! This is what you can expect to learn in fifth grade.

In Math, we will be using the Envisions 2.0 program and it is the same resource that you used last year. The fifth-grade program expands upon the concepts that you learned in fourth grade, and you will find it very familiar. You will need to be solid in your math facts, so please make sure that you are practicing them throughout the whole summer! We will begin our math year by reviewing some fourth-grade skills.

In Science, you will enjoy learning through hands-on experiments and will be spending the fall researching all about matter. In addition, you will learn about systems of the Earth, ecosystems, and the solar system during the remainder of the school year. There will be several fun projects for you to complete as you explore these units of study.

In Social Studies, you will be learning about the United States and how our country was settled. You will be studying geography, history, economics, and civics. You will begin your social studies experience by practicing map skills.

Reading in grade 5 will allow you to make connections to the stories, while you learn to cite evidence from the text and understand the author's message. We hope that you read some interesting books this summer and that you had fun completing the summer reading assignment. Included in this letter, you will find the link for summer reading, along with the teaching teams and your supply list.

We are looking forward to seeing all of you again. We've heard so many awesome things about this class from your fourth-grade teachers. We have heard that you worked hard last year, have a ton of grit, and are ready to be in fifth grade. We love Windham Center School, and you will too! Enjoy your well-deserved vacation and make some memories that you can share with us during this new school year. See you in the fall!

Don't forget to complete your summer reading. Click on the link to access the information.
Grade 5 Summer Reading

Fondly,

The Fifth Grade Teachers
