How To Get FREE Steem Power to Battle Bandwidth

The plan in a nutshell…

We will be using faucets to collect a number of different types of Cryptocurrencies and then transfer them to Blocktrades, where we will be able to convert them into Steem Power (it will all become clear as we proceed).

This Steem Power can be used to battle the Steemit bandwidth problem that a lot of new users have, or just to add some extra SP just through a few easy clicks each day.

All that is required is a lot of clicking every day, on Google Recaptcha and every day the amount you can earn goes up, as long as you remember to click every day.

Now it be will be really slow and not too productive to start, but you get extra if you recommend people and they do the same thing, giving it a real snowball effect, as you earn commissions on their clicks too.

I have created 8 parts on how to this, which I will include in this report, as video (DTube) links, links to tutorials on Steemit and a brief step by step overview of what is in each video, here in the report.

I will also include my referral links, which can be edited with your own referral links, so that you can pass this document on to anyone who needs it.

You will be able to include a link to this report in your signature on Steemit, or wherever you would like to share it.

It will need to be shared as a PDF, so that your own referral links stay in tact and within the report will be a link to the Google doc, so that it can be edited with the next person's referral links.

And I'll include that link at the end of the report, when I describe what to do to get the the report ready for your use.

THIS could really take off and be HUGE!

But it is an experiment and it needs YOU and YOUR Friends to help it work. And I have the PROOF it can work at the end of this report.

Steem Power does not have to be the end objective, It could be just a neat way of earning some extra cryptos.

Part 1: Sign Up to Coinpot…

Part 1 as a DTube video can be found here:
https://d.tube/#!/v/hopehuggs/dwe84uos
Part 1 in Screenshots can be found here:
https://steemit.com/howto/@hopehuggs/dwe84uos

Step 1: Go to http://coinpot.co/

Step 2:Click on register

Step 3: Add your email address, password, human verification (get used to this as a big part of the process), read and tick terms of service and then press register.

Step 4: Go to your email address and find the email

Step 5: Open the email and and click the confirmation link..

Step 6: Once registration is confirmed, you can press sign in...

Step 7: Enter your email address and password..

Step 8: And you are in! That is Coinpot sorted!

Step 9: Make note of your Coinpot email address

PART 2: Signing Up For the Coinpot Faucets

Part 2 as DTube video can be found here:
https://d.tube/#!/v/hopehuggs/s1s4vjyu
Part 2 in Screenshots can be found here:
https://steemit.com/steem/@hopehuggs/s1s4vjyu

Today we are taking the referral links and signing up to each of the faucets...

1. Bitcoin Faucet: http://moonbit.co.in/?ref=7964171af1be

2. Dogecoin faucet: http://moondoge.co.in/?ref=3ef8a7f5408f

3. Litecoin faucet: http://moonliteco.in/?ref=036eea2e6b84

4. Dashcoin Faucet: http://moondash.co.in/?ref=D01292B0A5BE

5. Bit Cash Faucet: http://moonb.ch/?ref=D7168E6A80D2

6. Bitfun: http://bitfun.co/?ref=216B917249B4

7. Bonus Bitcoin: http://bonusbitcoin.co/?ref=79B7E1D5DA82

Step 1: click on each faucet (1 - 5) to sign up with the email address you signed with Coinpot on. You will then have to verify that you are not a robot…

Step 2: Then you can start to claim your cryptos by pressing "Claim" and you'll get yet another verify you are not a robot page to do. This is the simplicity of this method, you can just click whilst you are doing something else as its so easy to do.

Step 3: It is the same process for for faucets 1 - 5.

Step 4: The sign up process is a little different for BitFun and Bonus Bitcoin, to sign up for Bit Fun (and Bonus Bitcoin), you need to create an account with a password. You'll need to check your email to verify the account, then you'll be able to sign in and claim the cryptos. Then you are ready to hit the claim button.

Step 5: Sign up for bitcoin Bonus. You will have to fill in register form like for Bitfun, then sign in to claim from the faucet, scroll down till you see ready to claim.

******

A Little Bonus Bitcoin Secret

A little secret to getting more satoshi is to click the "change your claim settings"

Here you will want to tick the "Always receive the average claim amount" because in reality you will get 15 or 16 satoshi each time, so signing up for the average means that you will get more. Of course you can wait for the lotto win of 5000 if you like.

*****

Step 6: Lastly rather than bookmarking all these faucets you can access them all by going to coinpot.co and clicking on them one by one as and when you need them.

Part 3: Get Your Referral links

Part 3 as DTube video can be found here:
https://d.tube/#!/v/hopehuggs/r6buj35y
Part 3 in Screenshots can be found here:
https://steemit.com/steem/@hopehuggs/r6buj35y

Step 1: When you log into the first 5 faucets

Bitcoin Faucet

Dogecoin faucet

Litecoin faucet

Dashcoin Faucet

Bit Cash Faucet

You can find the referral link at the top of the claim page, click that and copy your referral link and paste into a notepad.

Step 2: For, **Bitfun**, it's a little different, you need to select 'Account' and click on the referral link in there, so once again, get your referral link and note it down.

Step 3: For **Bonus Bitcoin**, there is a refer link found on the faucet page, just under where it says your email address and how many satoshi you have, press the 'refer' link and copy your referral link URL and note it down.

You have your referral links ready to pass on to other people.

I will go through the other steps of what needs to be done to get the actual Steem Power, then the last step will be, how to edit this report to include your own referral links to pass on.

Part 4: Converting all the cryptocurrencies into one Cryptocurrency in Coinpot

Part 4 as DTube video can be found here:
https://d.tube/#!/v/hopehuggs/96lncl00
Part 4 in Screenshots can be found here:
https://steemit.com/howto/@hopehuggs/96lncl00

Step 1: Go to http://coinpot.co and log in

Step 2: Select Bitcoin Core from the list...

Step 3: Click on "Convert Bitcoin Core to.."

Step 4: Choose Convert to Dogecoin

Step 5: Click on the word "maximum" and enter your password

Step 6: Click on convert.

Step 7: Confirm conversion by pressing button. IIt will confirm that you have just made that conversion

Step 8: Now repeat this same process with Bitcoin Cash, Litecoin and Dash.

Part 5: Checking You Have Best Cryptocurrency for Exchange Rate

Part 5 as DTube video can be found here:
https://d.tube/#!/v/hopehuggs/9ce8h8da
Part 5 in Screenshots can be found here:
https://steemit.com/howto/@hopehuggs/9ce8h8da

I just need to include this step, before I show the step on how to convert your cryptocurrency into Steem Power.

The question is how to decide which cryptocurrency to convert all the faucets too?

Ok, as we already converted everything to Dogecoin in the last step, I can check if if this is the best decision quite easily…

Step 1: Log in into Coinpot and see the amount that you have for Dogecoin, in this example it is 555.378

Step 2: Copy this and go to https://blocktrades.us/

Step 3: And find Dogecoin in the "Send" list and type in 555.378 as the amount.

Step 4: Find Steem Power in the "Receive" list and as you can see its worth 0.777 SP.

Step 5: Note this amount down so you can see whether it is better or worse than the other exchange rates.

Now I know that's not a lot, but I have a twist to share in the next video, that will make it almost 10x better than that so it would help with bandwidth issues very quickly.

Step 5: Next we will go back to coinpot and select "convert Dogecoin to".

Step 6: Select the currency (let's say bitcoin for this example), you'd like to convert to, click maximum and copy the amount down that is in "amount you will receive".

Step 7: Go to blocktrades and select bitcoin from the send list and enter in the amount and see how much Steem Power you would get. In this case it was less than what you would get for converting Dogecoin.

Step 8: You do the same process for bitcoin cash, litecoin and Dash.

Step 9: Then when you have pasted all the info in one place, you can easily see which has the best rate. With these small amounts, there is not a big difference, but if you did this for a month or more, the differences could be

quite significant. Today, the best exchange rate is Dogecoin, but if I needed to change it because one of the others has a better rate, I would convert everything into that currency instead.

Part 6: Converting Your Cryptocurrency Into Steem Power

Part 6 as DTube video can be found here:
https://d.tube/#!/v/hopehuggs/rpjfx21v
Part 6 in Screenshots can be found here:
https://steemit.com/steemit/@hopehuggs/rpjfx21v

Step 1: Go to Blocktrades - https://www.blocktrades.us/

Step 2: As we have decided from the previous step, that dogecoin is the best currency to use for today's conversion, we will select that from dropdown list on the "select coin to send"

Step 3: Then we go to coinpot (https://coinpot.co) and login, select dogecoin (this time) as this is what we converted all our coins to. We copy the amount we would like to transfer to steem power.

Step 4: Paste that amount in the "Send" side and select Steem Power on the "Receive" side, that is not a lot to start, right? But this method could really snowball once you have a few referrals. And in the meantime, if bandwidth is an issue, there is this awesome alternative, Select "Steem Power Delegation (90 Days)" instead...

****

The difference between Steem Power and Steem Power Delegation (90 Days) is that Steem Power is yours to keep forever and the Steem Power Delegation (90 Days) means you effectively rent the Steem power for 90s and then it will be taken back.

90 days should be enough time for your to generate enough SP either with your posts or even in part with this method to stop bandwidth issues being a problem.

******

Step 5: The next step on Blocktrades is to write your steemit username into "Your receive address"

Step 6: Copy the dogecoin address that it asks you send your doge too. (It will tell you what to do in this section whichever cryptocurrency you are transferring into steem power).

Step 7: Go back to Coinpot and select "withdraw dogecoin".

Step 8: Paste in the dogecoin address into "Withdraw dogecoin address
Select maximum amount to withdraw
Enter your Password
Show you are not a robot
Press Withdraw

Step 9: Click on "Confirm withdrawal" and you will get a message saying to confirm the transaction, you need to click the link in your email.

Step 10: Find the email in your email box and press the confirmation link in the email.

And you'll get the message that it takes up to 48 hours for this to be paid into your wallet

Part 7: Proof it All Works

Part 7 as DTube video can be found here:
https://d.tube/#!/v/hopehuggs/0mnyirth
Part 7 in Screenshots can be found here:
https://steemit.com/howto/@hopehuggs/0mnyirth

At the end of the last part, I just transferred dogecoin into the 90 days Steem Power Delegation. It took just over 48 hours for this to appear in my wallet.

Today, I am just providing proof that the system works showing amounts earned from each faucet from referrals, which we can check by clicking the "refer" button found at the top of each faucet page. (screenshots can be seen in the Steemit post above.

Bitcoin Faucet

18 Referrals and 3291 satoshi

*****

Dogecoin Faucet

18 Referrals and 28.30 dogecoin

*****

Litecoin Faucet

17 Referrals and 71929 litoshi

*****

Dashcoin Faucet

17 Referrals and 0.00020786 dash

*****

Bit Cash Faucet

17 referrals and 0.00009457 bitcoin cash

*****

Bitfun

18 Referrals and 2704 satoshi

*****

Bonus Bitcoin

15 Referrals and 1501 satoshi

*****

So, I have only tapped the faucets 2 or 3 times a day, the last few days, so let's see how much I have earned...

I converted it all to dogecoin = 255.61051092 Doge

And that is worth 3.656 Steem Power Delegation (90 Days)

It's not bad and if I did the faucets 10 or more times (which I will endeavor to do over the next 7 to 10 days) I will share my results regularly in my Steemit blog (@hopehuggs).

Part 8: Editing & Passing this Report On to Get Referrals.

Part 8 as DTube video can be found here:
https://d.tube/#!/v/hopehuggs/vv57lzdz
Part 8 in Screenshots can be found here:
https://steemit.com/education/@hopehuggs/vv57lzdz

Okay, so let's get sharing this method everyone, everywhere!

Step 1: Here is the report I created on Google Drive:

Anyone can view this report through this link, but not edit it...

https://docs.google.com/document/d/1PBNaV-JGdWmUOWyZUdQAi86Q
MhgTCFJm4XRS1ujFVkM/edit?usp=sharing

Step 2: When you have opened that page, select file, download as and
select Microsoft Word Doc or OpenDocument format

Step 3: The pages that need editing with the referral links are pages 6 & 7. So delete my referral links and put in your referral links.

Step 4: Then save the document as a PDF :

And save that on your Google Drive (or anywhere that other people can access it with a link like Dropbox or Mediafire).

You can find the link for that PDF report to share...

And then copy the link for the PDF

Step 5: That PDF is now your report that you can pass on in your Steemit post signature or wherever you want to share it

You enter it on your signature in your Steemit blog posts, with words to this effect

"Free Steem Power - Find Out How"

Then people will get the PDF when they click on those words

AKA SHARE, SHARE, SHARE
(and CLICK, CLICK, CLICK)
the COINPOT FAUCETS

This little system could earn you some significant Steem Power if you continue to click the faucets everyday and get referrals and encourage them to do so.

There are of course other ways you can get free crypto.

One that springs to mind is this one:

https://www.earncrypto.com/earn-free-dogecoin/?r=188809

And also I bought this, which I am finding very useful and thought I'd share with you:

150 Free Ways to Earn Bitcoin
