

Hello, my name is [Your Name]. I'm a constituent in [postal code], and I'm calling about the rollout of the BC Children & Youth Disability Benefit. Please ensure this message is shared directly with the MLA.

I support expanding disability supports to children who were previously excluded. Inclusion is important.

However, expansion must not come at the expense of children who currently rely on consistent services.

I'm particularly concerned about implicit "low" versus "high functioning" categorizations. Autism is a spectrum. Support needs ebb and flow across environments and developmental stages. A child who appears stable may be stable because of intervention — not because they no longer need support.

Progress should not be used as justification to remove funding.

I am asking the MLA to advocate for:

- Clear and transparent eligibility criteria
- Protection against penalizing children for progress
- Strong transitional safeguards for families currently receiving funding

Families need stability, not uncertainty.

Please confirm this concern is formally logged and that I will receive a written response.

Thank you.
