# Email confirmation code changes

Suggested edits to align with Style Guide

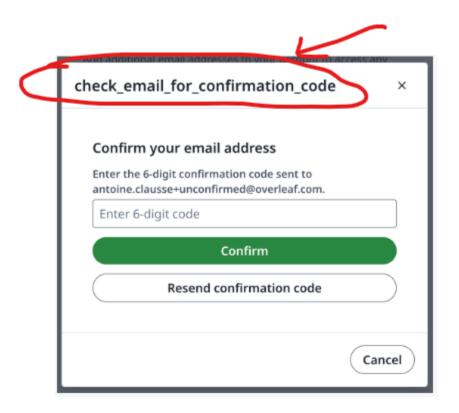

While this is editing an existing thing, I'd suggest we try to make the intro paragraph less complicated and also remove some of the institutional language.

### **NEW TEXT:**

Adding additional email addresses can allow you to access any upgrades available via your university or organization. It also makes it easier for collaborators to find you and ensures you can recover your account.

To change your primary email, add the new primary email address and confirm it. Then click **Make Primary**. <u>Learn more</u> about managing your email addresses.

I wasn't sure if the title highlighted in red is some sort of placeholder. But on the off chance that it's not, suggested change:

## Modal title:

**Confirm your email address** 

# **Body:**

We've sent you a confirmation code

Enter the 6-digit code sent to [email address].

antoine.clausse@overleaf.com
Unconfirmed. Please check your inbox.
Resend confirmation code
Primary

Change this to just say:

# Unconfirmed

Resend confirmation code
