TABLES AND FIGURES

* Permissions

Authors wishing to include figures, tables, or text passages that have already been published elsewhere are required to obtain permission from the copyright owner(s) for both the print and online format and to include evidence that such permission has been granted when submitting their papers. Any material received without such evidence will be assumed to originate from the

authors. All figures should be in high resolution and readable. Authors are encouraged to submit the original format and file of the figures (not an image) if they are created using other software.

Tables

Number tables consecutively and use table numbers when refereeing to a table (Table 1, Tables

2, 3...) Use uppercase and lowercase letters for the title of the tables as shown here. Table caption must briefly explain the contents of the table.

Round to two decimal digits of accuracy while reporting correlations, proportions, and inferential statistics such as t, F, and χ^2 .

Figures

Place and label figure captions below each figure, in uppercase and lowercase letters. Type (Figure 1.

Captions...). See example as shown

Figure 1. Summary of the user's perception on the enforcement and effectiveness of the institution's information security policy.

EQUATIONS

Number equations consecutively with equation numbers in parentheses flush. Use the equation editor to create an equation. Be sure the symbols in the equations are defined right after the equation appears or immediately following. See Equation 1 and a further example in Equation 2.

$$P(x)=\frac{n(x)}{n} \quad (1)$$

$$q(x) = 1 - p(x) \quad (2)$$

where,

$n(x)$ = the total number of samples located in $[x_i, x_i + x]$,

n = the total number of samples in $[x_1, x_2]$.
