

Hey <givenName>,

Did you know? 83% of statistics are made up on the spot. But don't worry, these are real statistics. Or are they?

While we're on the topic of surprising facts, there's something else I wanted to share with you.

*<I love the constant motivation you are providing to your audience. I really prefer the before-after transformation photos you share. Amazing how much you can achieve in 6 weeks with good guidance! Thanks for the motivation, Q!>*

On a more serious note: after researching your business and target audience, I believe there's an opportunity for you to increase your digital buzz and engage with your audience more effectively.

*I <created a sign-up page that converts the coldest leads into hot customers and raving fans, building up your email list to 1.5x times its size, through the power of persuasion.>*

I went ahead and pasted it below.

If you like it, I have more ideas to fortify your online presence and strengthen your customer loyalty.

Thanks,  
Mark
