

Beginning Swedish Research using ArkivDigital

Objective: Introduce the 5 main church records; learners become familiar with the format of the available church records on ArkivDigital. Participants should be able to navigate ArkivDigital index site to search for ancestors.

5 Main Types of Swedish Church Records

1. Birth and Christening Records
2. Marriage Records
3. Death and Burial Records
4. Moving-in and Moving-out Records
5. Household Examination Rolls

Records were kept at the parish level. One parish covered approximately 1000 square acres. The population varied from about 200 people in the countryside to a few thousand in more urban areas. The Lutheran church was a state church. Priests and clerks were basically state employees. All records kept by the church were the vital records for the government. The handwriting can be challenging. BYU Script Tutorial page is a great website for learning how to read the writing. <https://script.byu.edu/>

Hints for Searching

Spelling- The following letters are sometimes interchangeable in Swedish

V and W C and K I and Y E and Ä K and Q U and V (after Q)

This is a partial list of possible letter substitutions for a more complete list see:

https://www.familysearch.org/en/wiki/Sweden_Languages#Spelling

Please note, A is not a substitute for Å or Ä and O is not a substitute for Ö. There are 29 letters in the Swedish alphabet including 8 vowels. The additional vowels are found after Z in the Swedish alphabet.

Names- Most names are patronymic (names derived from an individual's father). However there were other types of surnames present. These names could be influenced by factors such as occupation, location, personal attributes, military service, or nobility. In the late 1800's, Swedes started to transition to fixed surnames. The change was gradual and not fully standardized until the early 20th century.

Dates-When writing dates in ArkivDigital use the "year-month-date" format. For example, 3 April 2024 would be written as 20240403. At times, in the Swedish Church Records, a priest recorded the date of an event by the name of the Fixed or Moveable Feast Date which is based on the liturgical year (the church year) rather than the Julian or Gregorian date that we would recognize. This is especially true in Southern Sweden and areas that formerly belonged to Denmark.
