

Full body AR and DHT / High Kisspeptin levels. AR and DHT driven penis growth. The penile tissue remains extremely sensitive and responsive to androgens. AR (Androgen Receptor) is the main receptor that binds androgens like DHT and testosterone. It is the central driver for androgenic muscle growth & is essential for the growth of the penis.

Use the newer Camp 8 with this for best results

This is the newest and strongest Monsterous Male Enhancement and it is far superior to the former ones. Retrotransposon BLV virus formula inserting phenotypic 15 inch BWC penis restructuring genes & regulatory hyper-functional androgen payloads into intronic regions of penile-dedicated tissue expression clusters, ensuring continuous volumisation and growth of the penis. The genome is colonised by BLV-type synthetic retroviral sequences, engineered to evolve in vivo and insert cock-volume optimization code via site specific recombination at AR-linked loci. Vampyric retroviral superviral system, modeled on the retrotransposons & the HIV pathway, uses integrase to embed female corrupting hormones into women via semen and body wastes triggering exponential sexual obsession + exploits reverse transcriptase to overwrite females reward systems in their brain structure into romantic-sexual slavery. Once you cum, piss or any body fluids / wastes into someone's body they are infected and bugged with your virus like an STD, through retrovirus like DNA delivery for reward system driven obedience function in their brain structure.

This has sexual selection for the biggest cock size and for AR function in the penis. Extreme hentai exaggerated male genitalia benefits except using optimal, balanced, optimized words related to the tunica in order to maintain powerful erections. Blood-gorged 15 inch hypertrophic cock with controlled hyperplasia that even hangs between your legs when soft and has hung melon sized balls to match. Massive bear arm penis, horse cock and horse balls - the size of some like obscene monument, veins bulging along the length, autologous foreskin restoration + cock head swollen like a bear paw - entire penis is engorged with AR maintaining growth focused signaling for androgen receptor gene activation & androgen driven cock hypertrophy via androgen receptor binding and signaling. BLV simulates cock-maximising mutations facilitating autologous cock expansion in a self-replicating loop of androgenic dominant growth, the regulatory evolutionary mechanisms favouring continuous growth and hypertrophy within penile domains.
