

GON AVOK
LOAD ORDER
For Xbox Series x
2025

(LLO2 TEMPLATE WITH MINOR CHANGES)

Special notes before downloading:

Please download the Largest size mod first, which is, SKYLAND AIO. For those who didn't know, when Bethesda updated Skyrim, it introduced a creation bug in which you need double the size of the mod (*for example, a 5gb mod needs a 10gb free space*).

A big thank you to AussieGamer723 for using my old modlist and reporting every bug or crash encounters. I will ensure you that this updated mod list is very stable and has been playtested with all the DLC's and Questlines. Further testing still needed for ALL quests but other than that, I am happy to say it is very stable as long as you follow the LO.

Treat this Load order as a Vanilla Plus LO. I tried to get close to vanilla feeling and vibes with the combinations of mods I made. It also increases interactivity, dialogues and encounters in a very vanilla way! Other than that, Thank you for following this LO!

And for this who are questioning why the LO name is GON AVOK, it basically means Start Over, such is life for Skyrim players!

Here is what to expect with this LO

- High quality textures 🏔️
- Many Dialogues 💬
- Much more encounters 🧑🏿🧑🏻
- Dynamic reputation system ⭐
- More world Interactivity 🌍
- Sound Effects Overhaul both combat and worldspace sound fx 🎵
- Beautiful Weather system 🌧️☀️🌩️🌨️
- Minimal follower Overhaul for minimal bugs 🧑🏿🧑🏻
- Beautiful Town and cities overhaul with minimal conflict 🏠
- Lights and effects overhaul 💡
- Realistic armors and replacers which are optional 🛡️🏹🗡️
- Creatures overhaul 🐉
- Flexible Load order (customize it all you want, optional files are labelled) ⬆️
- VERY FEW BUGS and CTD problems ✅

- Alternate perspective Ae patch
- Alternate perspective Mbe 2.0 patch
- Alternate perspective rs children patch

Water

- Elden water 11.40mb

Bottom

- Remove small rocks 112kb

Special Ending note

To get the Graphic fidelity that i have posted here are some things I made with the SWF powers and Busty skeevers configurations:

VIVID Weathers settings

Everything is set to default except bloom in which I set to 0 and Night brightness in which I set to 3

Busty skeevers

When opened, set to default, then go to Display, set the contrast and shadows correction off, Softness settings should be at 0.40. FOV is 80. After that go to the potions menu and drink the dof toggle.

Footnote:

- Total Usage 4.86gb
- Free Space: 133.28mb
- Free space without optional file: WIP
