WHY SHOULD YOU WORK IN THIS POSITION			
<p>Our Data Team's mission is to <i>"Make sure insights be able to reach every corner of the enterprise"</i>, with the core value of supporting data-based decision making at departmental and organizational scale.</p> <p>At the Data Team, we aim to deliver quality data that the business can trust; and foster a culture of analytics through communities of practice, office hours, and gamification. Our team improves data analyst productivity by managing centralized data catalogs and data preparation tools that capture tribal knowledge.</p> <p>Through our deep research and reports about our business and the market, we build insights and provide recommendations for business, as well as product decisions. Our team also deploys multiple advanced data analytics and is involved in implementing Machine Learning products.</p>
