1. Overview

The add-on allows you to set up several subscription options for each vendor plan. The cost depends on the payment frequency. For example, you can pay for the same plan monthly or pay for a year of use at once and save.

1.1 Support

This add-on is developed and published by Cart-Power, a CS-Cart official partner and developer. You are guaranteed a high-quality add-on supported by future versions. If you need help, please contact us via our [helpdesk system](#).

1.2 Compatibility

The add-on is compatible with CS-Cart **4.10.x - 4.18.x**

If you have any issues installing or activating the add-on, please contact us: sales@cart-power.com

3. Add-on Settings

The vendors' tariff plan is checked when the administrator logs in to the admin panel. The administrator may not log in for several months and the tariff plans will not be charged until the administrator logs in to the admin panel.

To avoid this, you can set up CRON (dispatch=vendor_plans.async). This will allow you to set the time when the vendor plan payment will be checked automatically.

You can read more about CRON [here](#). If you do not know how to do this, please contact your server administrator for help or write to us at sales@cs-cart.com and our specialists will help you.
