

Keep Our Headphones!!!!

Do you want our classroom to be so loud we make each other deaf? Well, of course not! That is exactly why we need to keep our headphones.

Say we need to do some research and watch a video on [YouTube](#), well we won't be able to hear the video with about 27 other videos on maximum! Research in 2016 shows that listening to music is actually beneficial to your workload! (Source: TheConversation.com)

Also, when we are doing our spelling bee on [Vocab.Com](#), we won't be able to hear our words, and we will have a higher chance of getting all of our words wrong! Plus, exposing children to music helps them to learn new words! (Source: BrightOrbits.Com)

And, what is going to happen when you want to listen to some music while doing your reading activities? Well, you can say goodbye to those song lyrics if you don't have headphones.

Last, but not least, when the kids next to you are yelling and screaming, just pop on your headphones and it muffles most of their noise!

So do you want our classroom to be a disco or not? We need headphones in class.
