

Theories of Global Public Administration

Course Overview

As the global society advances, it becomes imperative to discuss the public administration theories that are applicable to diverse nations and the global society itself. Public administration theories that deal with Western capitalism, socialist nations, communist nations, and the global society should be discussed. Theories of global public administration should be distinguished from the development administration of the developing countries of the 1960s, and theories that can be applicable to the 21st century should be discussed. Theories of global public administration are closely related to the global society's quality of life and well-being. This course will discuss administration theories that are appropriate for the global society, as well as global organizations, global leadership, cultivation of global talent, global governance, and global policy.
