

How to share files using Google Drive for Windows

You can share files and modify sharing settings on any file through Google Drive for Windows.

1. Double-click the Google Drive (G:) and browse to the folder or file you want to share:

▼ Folders (7)

3D Objects

Desktop

Documents

Videos

▼ Devices and drives (2)

Windows (C:)

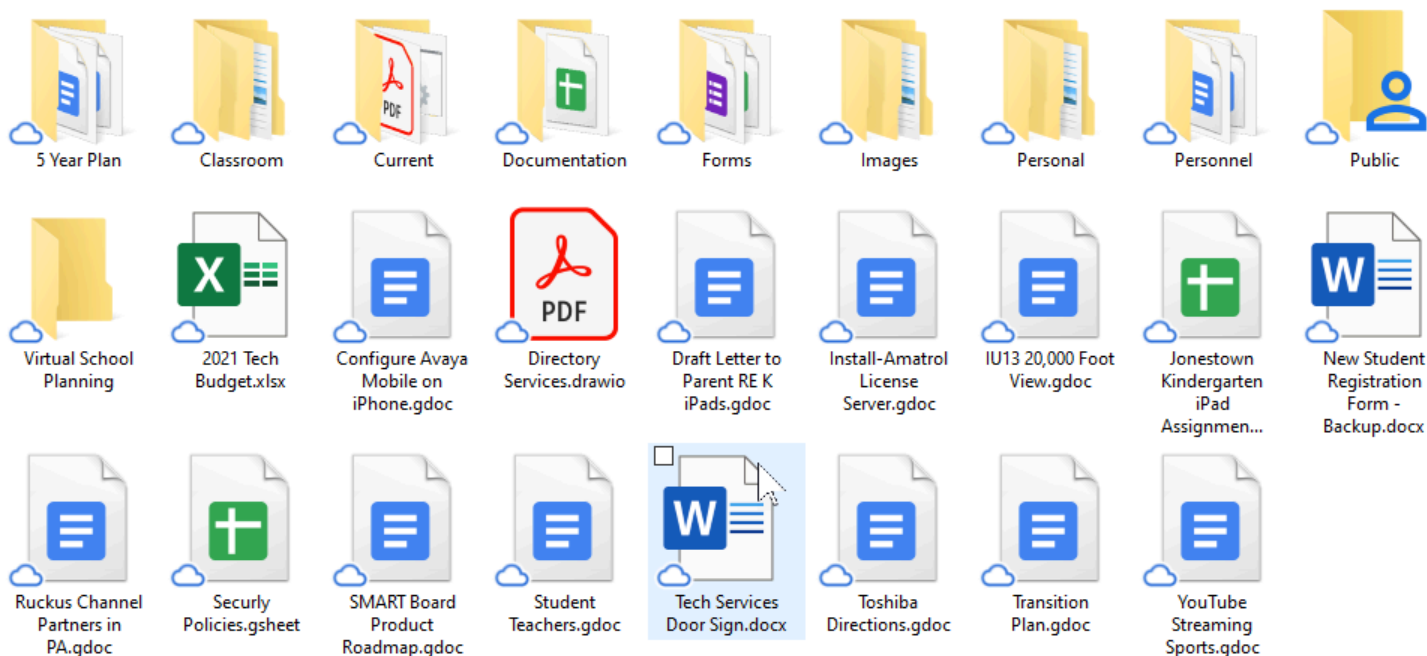

77.0 GB free of 237 GB

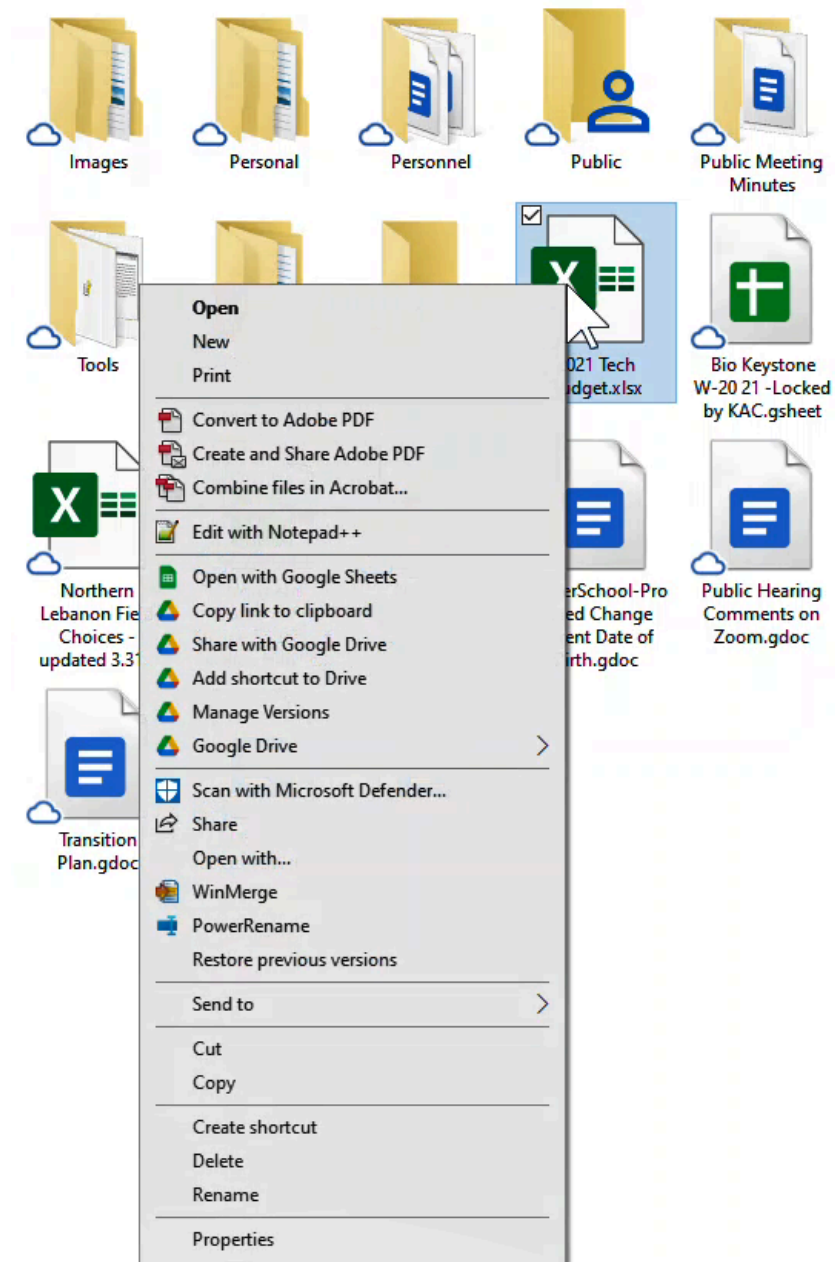

Google Drive (G:)

73.1 GB free of 237 GB

2. Select the folder or file you want to share, then right-click on it. You will see several options for managing Google Drive files:

3. Select the option **Share with Google Drive** from the menu. A separate dialog box will appear.

4. Use the dialog box to add users to or remove users from the sharing permissions. Use the drop-down to the right of each user's name to change the permission level for that user. When finished, click the **Done** button
