

5. Group presentation on half an IO

Your group is going to present half an IO on the three stills from your extract and three stills from the 'satellite' commercials from the Dove Campaign for Real Beauty. In the actual IO, you will not have a slideshow. But to make this group presentation to your class more dynamic, you will have **slides**. [Make a copy of this template](#) for your presentation. Give each person in your group editing rights. Move your notes and screenshots from the previous activities (worksheets 3 and 4) into this slide show to present your presentation. You can use the '**speaker's notes**' section in your slideshow to include a few notes about Points 1-3 from your previous (P EE EE L) worksheet. Your presentation should be under **5 minutes**. You will be assessed individually, based on your individual performance during this group presentation, using the assessment criteria for the Individual Oral.

Before you deliver your presentation, [check out this video](#), which helps you with some of the language and 'signposts' that you will need to deliver the P EE EE L method that was explained in the previous worksheet.
