

Canyon Science Secondary Retake, Redo, Reassessment Agreements Implementation Year 2026-2027

At Canyon Middle School, we are dedicated to creating and implementing grading practices that support accuracy, motivation, and bias resistance. We are also working to create systems that improve access and preparation for post-high school experiences. For the 2026-2027 school year we will be continuing to implement the following agreements in the departments. During the 2026-27 school year, we will be analyzing these agreements to determine potential areas of improvement and next steps for the Canyon program.

For the 2026-27 school year 6th grade science teachers will implement the following Retake, Redo, Reassessment practices in all classes (at a minimum):

- Every student will be afforded the opportunity to retake, redo, reassess any “major assessments” if they received a score on the major assessment that does not meet standards (below 70% or less than a 2 on a 4 point rubric).
- Students will be able to access reteaching during instructional hours (class time/Rtl time) and will demonstrate readiness for the reassessment.
- Opportunities to complete retakes, redos, and reassessments will be provided during instructional hours and every student who qualifies for a retake, redo, reassessment should be strongly encouraged to complete the process.
- After completing a retake, redo, reassessment, the highest grade will be added to the gradebook for that assessment and the lowest grade for that assessment will be dropped from the final grade calculation.
- Individual teachers will determine whether a student is required to complete the entire assessment or portion of the assessment for the retake, redo, reassessment, in order to meet a minimum standard of proficiency (70%).
- The retake, redo, reassessment window for major assessments will ensure a reasonable amount of time for reteaching, reassessment and scoring prior to the end of a quarterly grading period as determined by the teacher.
- Students who score above a 2 on the 4 four point scale will not be allowed retakes.
