

“Give me the power to produce fever and I'll cure all disease” Parmenides, 500 BC.

“Systems do not exist in Nature, but only in men's minds.”- Claude Bernard

“constancy of the internal environment is the condition for the free life” - Claude Bernard

“The specific disease doctrine is the grand refuge of weak, uncultured, unstable minds, such as now rule in the medical profession. There are no specific diseases; there are specific disease conditions.” – Florence Nightingale

CPE - Control Experiment - 21 April 2021 - English version

**ONE IRREFUTABLE FACT  
AND ITS 2 INESCAPABLE CONCLUSIONS**

**FACT:** No “virus” has ever been purified  
and shown to cause (by itself) certain  
symptoms in humans or animals.

**THAT MEANS:** There is no scientific basis to the  
claim that any “virus” exists as a mechanism for  
disease causation in humans or animals.

**THEREFORE:** There can be no possible merit to  
any “vaccine” since you can’t make a “vaccine”  
for a “virus” you can’t even prove to exist.

 **THERE \*IS\* NO “VIRUS”** 

**\*Leading Corona researchers admit that they have no scientific proof for the existence of a virus\***

**What you will read in this article is the scientific evidence that it has never been proven that the "deadly" COVID-19 virus exists. In fact, all of the leading scientists on COVID-19 (SARS-CoV-2) have admitted that the scientific rules to prove COVID-19 have not been established. The global corona pandemic is simply based on assumptions and on agreed consensus and not science at all. This may sound unbelievable at first, but please read for yourself and see the facts that prove this irrevocably. Only after you have read this article will you be able to make a good judgement about the current COVID-19 Plandemic**

"Many orthodox people speak as though it were the business of sceptics to disprove received dogmas rather than of dogmatists to prove them. This is, of course, a mistake. If I were to suggest that between the Earth and Mars there is a china teapot revolving about the sun in an elliptical orbit, nobody would be able to disprove my assertion provided I were careful to add that the teapot is too small to be revealed even by our most powerful telescopes. But if I were to go on to say that, since my assertion cannot be disproved, it is intolerable presumption on the part of human reason to doubt it, I should rightly be thought to be talking nonsense. If, however, the existence of such a teapot were affirmed in ancient books, taught as the sacred truth every Sunday, and instilled into the minds of children at school, hesitation to believe in its existence would become a mark of eccentricity and entitle the doubter to the attentions of the psychiatrist in an enlightened age or of the Inquisitor in an earlier time."

Bertand Russell

### **Germ Theory: The Lynchpin Holding the Entire Hoax Together**

There's no such thing as a contagious "virus." Unbelievable? Shocking? Yes, it is. Here are quotations from doctors, authors and experts that refute Louis Pasteur's fraudulent "germ theory." This is the lynchpin issue that holds this entire planned-demic together. When you disprove the theory that so-called viruses can be transmitted through the air from one person to another, the entire house of cards falls to the ground:

"The entire fabric of the germ theory of disease rests upon assumptions which not only have not been proved, but which are incapable of proof, and many of them can be proved to be the reverse of truth. The basic one of the unproven assumptions, wholly due to Pasteur, is the hypothesis that all the so-called infections and contagious disorders are caused by germs." — M.L. Levenson, M.D.

"We said before that so-called 'germs' are ubiquitous. They are ever present, in many varying forms in both healthy and sick people. These microbes kick into what modern scientists call 'pathogens,' when the media is toxic and conducive to clean up. When you enter into a healing crisis, and your body is throwing off toxins, these 'germs' appear out of your very substance, to help eliminate, process and break down these toxins. Germs have absolutely no causal relationship to disease. But germs do appear to help you clean out, because put quite simply, your disease is your cure!" — Dr. William P. Trebing, author of "Good-Bye Germ Theory," page 154

"If the Germ Theory were true, no one would be alive to believe it." — B.J. Palmer, D.C.

"Three criteria are, according to the scientific method needed to properly identify a virus. It must be isolated from a host cell. As of 2016 this has never been accomplished in humans. It must be photographed and its diameter measured. As of 2016 this has never been accomplished in humans. It must be biochemically characterized. As of 2016 this has never been accomplished in humans. This has never been done with any virus (herpes, hepatitis, h1n1, bird flu, swine flu, influenza, polio, measles) let alone HIV, HPV, SARS, Zika or Ebola." — Viruses. How Much is that Dogma in the Window?, New Medicine Online

"We agree with those members of the profession who hold that no germ causes tuberculosis. Germs do not cause any disease. Further, we agree that there is more harm in the fear of germs than there is in the germs themselves." — Simon Louis Katzoff, M.D., author of Timely Truths on Human Health, 1921

"Germs seek their natural habitat: diseased tissue, rather than being the cause of diseased tissue." Rudolf Virchow

"The general public have been told that we do not become ill except when germs penetrate into from without. The germ theory of disease is ridiculous." — E. Douglas Hume, author of Bechamp or Pasteur, A Lost Chapter in the History of Biology

"Medical doctors are working on the germ theory of disease... But the germ theory is already weakening and is due for being thrown aside. Dr. Fraser of Canada and Dr. Powell of California have experimented with billions of germs of all varieties, but they have been unable to produce a single disease by the introduction of germs into human subjects. Dr. Waite tried for years to prove the germ theory, but he could not do so. During the World War an experiment was conducted at Gallop's Island Massachusetts, in which millions of influenza germs were injected into over one hundred men at the Government hospital, and no one got the flu. Germs are scavengers." — Principles and Practice of Naturopathy, E.W. Cordingley, M.D., N.D., A.M.

"You're working under a wrong premise to begin with and you're never going to find the answer if you do that. Viruses have no nucleus. There's no respiratory system. There's no circulatory system. There's no digestive system. Viruses are not alive. That's like saying soap is alive. They're not alive. They are solvents. They are soaps. However, more accurately, they are enzymes to fractionate tissue for waste elimination." — Aajonus Vonderplanitz

"We must infer that at least some and probably all three of those Russian peasants died because of Pasteur's vaccine, as did uncounted people later on... Only one thing is sure: ever since Pasteur developed his "vaccine," the cases of death from rabies have increased, not diminished." — Hans Ruesch, animal rights activist and pioneer of the anti-vivisection movement

"Had it not been for the mass selling of vaccines, Pasteur's germ theory of disease would have collapsed into obscurity." — E. Douglas Hume, author of Bechamp or Pasteur, A Lost Chapter in the History of Biology

"The culprit however, is not the microbe. It is the level of toxicity you have in your own blood stream." — Good-Bye Germ Theory, Dr. William P. Trebing, 2006

"We must look rationally at the bacterial issue. Consider the fact that many tribes ate primarily unsalted raw meat, unsalted raw fats and/or unsalted raw dairy products from the beginning. They did not wash their hands or sterilize their food before eating. Every form of natural bacteria, including salmonella, E. coli and campylobacter were eaten with their food abundantly and constantly. Why were they vibrant, healthy and disease free if microbes are the culprits?" — Aajonus Vonderplanitz, The Recipe for Living Without Disease

"In all that I have witnessed inside and outside of laboratories, there is only one cause of disease: Industrial pollution in medication, food, air, soil and water. Strengthening a body's constitution and lymphatic system is the first step to reversing/curing disease" — Aajonus Vonderplantiz

"Germs cannot be the cause of disease, because disease germs are also found in healthy bodies." — H. Lindlahr, M.D., author of Nature Cure

"In 1915, another medical doctor wrote an article for the top British medical journal Lancet. Dr. Montais studied 21 cases of tetanus, each of whom had received Pasteurian inoculation. The conclusion of the article, which appeared in the 23 Oct 1915 issue, was that in every case, the tetanus had been caused by the inoculation. Dr. Montais said that 'Pasteur had created a new form of disease.'" — The Post-Antibiotic Age: Germ Theory, Dr. Tim O'Shea

"What's happening is, like I said, we have colds, which are mainly bacterial, which go feed on toxic tissue that's been damaged – we don't eat well enough, we don't eat all raw and therefore we accumulate toxicity. So bacteria have to come in and eat that waste product because we can't keep up with all the waste. OK. So that's what a cold is. Flu is mainly viral. Some bacteria may be active during flu. Some areas of our bodies may not be so contaminated that bacteria – the natural way that we cleanse with bacteria when we're overloaded with toxicity or waste products, will help us. But when we are so toxic that the bacteria are poisoned by the tissue, from chemical inundation, then we have to make solvents. Each cell makes a solvent. Each cell makes a soap to help clean itself. And it's a union. It's like a factory. All the particular cells get together and say, "Let's make this to help clean ourselves." So they make enzymes which we will call soap to do that. So there's nothing dormant about it. It's just that when the accumulation of industrially contaminated waste is so great and you can't use microbes then the cells make solvents, that is, viruses we call flu." — Aajonus Vonderplanitz

"Any kind of flu is the same thing. When the climate and temperature are right, certain tissues will cleanse. They may have a 7-years cycle. They may have a 6-months cycle. It depends upon the tissue and how contaminated it is. If certain tissue needs to cleanse every two years, our bodies will create, if waste tissue is too toxic for microbes, our bodies will create a solvent (a virus) that fractionates and cleanses that particular tissue every two years, every 6 months, every 3 months, every 7 years, every 12 years, depending upon that tissue and how contaminated it is. The myth that herpes is contagious is pharmaceutical industry fiction to scare you into taking medication." — Aajonus Vonderplanitz

"Actually bacteria are our symbiotic partners in both health and disease. They serve a useful role. As scavengers they make harmless or remove undesirable substances within our bodies. They also elaborate certain of our body needs. That is, they help build complex organic compounds from simple ingredients. A notable example of this is the production of vitamin B-12 in our intestines." — Dr. T.C. Fry, author of The Vibrant Diet: The Timeless Guide to Eating Our Natural Biological Diet

"'Infection' is no war in which the body is fighting invaders. The bacteria that come to these sites are symbiotic and help the body in elaborating dead cells and tissues for expulsion-they are partners in the cleanup process. When this has been accumulated the bacteria disappear and the wound heals. Infection... is a body-cleaning process for a body burdened with toxic materials." — Dr. T.C. Fry, author of The Vibrant Diet: The Timeless Guide to Eating Our Natural Biological Diet

"We need to re-direct our perspectives of microbes and see them in a new light. In terms of bacteria, for example, we need to appreciate them as: Bodily inhabitants who assist us in such ways as protecting us from other organisms (e.g. fungi), assisting in digestion and metabolism of food, synthesizing vitamins, and helping to eliminate waste materials." — Dr. Paul Goldberg

"Do germs cause disease? Or could it be the other way around... first, the disease, then the germs. Natural Hygiene contends that germs do not cause disease. They are not the originators. Most diseases occur when people allow themselves to become enervated, that is, low in nerve energy. As a consequence, the organs of excretion fail to function normally and waste material accumulates in the body. When this waste continues to build up, exceeding the body's toleration point, a crisis arises. The body, to offset this overabundance of poisonous matter, begins to react.

The result of this reaction is sometimes a cold, the flu, pneumonia, or some such, depending on the individual. At this crisis point of elimination, germs may or may not be present. They are sure to come later, not to attack, but to assist in the cleanup or cleansing process.” — Dr. Alec Burton, M.Sc., D.O., D.C.

“Hygienists object to the germ theory of disease because germs do not cause disease. They may be present in disease processes, and they may complicate a disease with their waste products which can be very toxic at times, but the germ or virus alone is never the sole cause of disease.” — Dr. Virginia Vetrano, D.Sc

“Germs are saprophytes; that is, they live off dead and decaying organic matter. Bacteria are actually our benefactors. They decompose our excretions, helping to rid the system of them. Bacteria are non-toxic, and non-virulent as long as body secretions and excretions are normal. When toxemia exists, that is, when metabolic wastes accumulate in the system in excess, causing the secretions and excretions of the body to become abnormal and poisonous, a non-pathogenic bacterium can turn into a so-called pathogenic one simply by feeding on toxic wastes. Bacteria excrete toxic waste only when human secretions are abnormal and when the cells of the body are killed by excessive toxic saturation, bacteria go to work to disorganize them and help the body rid itself of dead tissue. ‘Disease producing’ germs are often present in the absence of the disease they are supposed to cause. They are often found when an individual has not had the disease that a particular germ is supposed to cause and when the individual never develops the disease. Furthermore, in myriads of cases, a particular pathogenic germ is not present when the disease it is supposed to cause exists.” — Dr. Virginia Vetrano, D.Sc

“Germs do not cause disease! Nature never surrounded her children with enemies. It is the individual himself who makes disease possible in his own body because of poor living habits... Do mosquitoes make the water stagnant; or does stagnant water attract the mosquitoes? We should all be taught that germs are friends and scavengers attracted by disease, rather {than} enemies causing disease... As their internal environment is, so will be the attraction for any specific micro-organism... The germ theory and vaccination are kept going by Commercialism.” — Dr. Robert R. Gross

“Warmth, moisture, food—these are the causes that activate latent germs and arouse them to activity. They exist, all except the food, in the mouth, nose and throat at all times. The food is thrown out into these, as excretions, in disease. The germs feed on the excretions. They are scavengers. They were never anything else and will never be anything else. They break up and consume the discharge from the tissues. This is the function ascribed to germs everywhere in nature outside the body and is their real and only function in disease. They are purifying and beneficial agents. The medical profession has worked itself into hysteria over the germ theory and is using it to exploit an all too credulous public. Germs are ubiquitous. They are in the air we breathe, the food we eat, the water we drink. We cannot escape them. We can destroy them only to a limited extent. It is folly to attempt to escape disease by attempting to destroy or escape germs. Once they are in the body the physician has no means of destroying them that will not, at the same time, destroy the patient. We cannot avoid germs. We must be proof against them. We have to accept them as one of the joys of life.” — Dr. Herbert Shelton

“Just remember that there are no contagious diseases, just contagious habits which lower your vitality. There have been many people who have had diphtheria and yet no germ could be found. The same can be said of tuberculosis and other diseases. This is why the virus had to be discovered — to save the germ theory.” — Dr. Virginia Vetrano, D.Sc.

“Medical science is based on a false premise: namely, that diseases are caused by extraneous influences.” — Dr. John Henry Tilden, M.D., author of *Toxemia Explained*

Vaccine Fraud: Centuries of Testimonials from Doctors and Researchers Proving that Vaccines are Dangerous and Profitable The first smallpox vaccine was conceptualized in 1796. Since that time, vaccination has been rife with controversy. Let’s review what writers, doctors, and scientists have observed about vaccines across three centuries: the 19th, 20th, and 21st... 19th Century (1800’s)

"There does not exist one single fact, in all the experiments and improvements made in science, which can support the idea of vaccination. A vaccinated people will always be a sickly people, short lived and degenerate." — Dr. Alexander Wilder, MD, author of *Vaccination: A Medical Fallacy*, editor of the New York Medical Tribune, 1879

"I have seen leprosy and syphilis communicated by vaccination. Leprosy is becoming very common in Trinidad; its increase being coincident with vaccination." — Dr. Hall Bakewell, Vaccinator General of Trinidad, 1868

"Cancer is reported to be increasing not only in England and the Continent, but in all parts of the world where vaccination is practiced." — Dr. William S. Tebb, MA, MD, DPH, author of *The Increase of Cancer*, 1892

"Leprosy arose with vaccination." — Sir Ronald Martin, MD, 1868

"Syphilis has undoubtedly been transmitted by vaccination." — Sir William Osier Bt., MD, FRS, FRCP

"To no medium of transmission is the widespread dissemination of this class of disease (syphilis) so largely indebted as to Vaccination." — Dr. B.F. Cornell, MD, 1868

"Every intelligent person who takes the time to investigate vaccination, will find abundant evidence in the published writings and public records of the advocates of vaccination, to prove its utter worthlessness, without reading a line of anti-vaccination literature. And if we could add to this all the suppressed facts, we would have a mass of evidence before which no vaccinator would dare to hold up his head." — Dr. Robert A. Gunn, MD, *Vaccination: Its Fallacies and Evils*, 1882

"I have no faith in vaccination, nay, I look upon it with greatest disgust, and firmly believe that it is often the medium of conveying many filthy and loathsome diseases from one child to another, and it is no protection from smallpox." — Dr. William Collins, MD, London, 1882

"Vaccination has made murder legal. Vaccination does not protect against smallpox, but is followed by blindness and scrofula. Jennerism (Edward Jenner, an English physician who was a contributor to the development of the smallpox vaccine) is the most colossal humbug which the human race has been burdened with by FRAUD and DECEIT." — Mr. Mitchell, member of the British House of Commons

"Of these dogmas, I believe the practice known as vaccination to be the most absurd and most pernicious. I do not believe that a single person has ever been protected from smallpox by it; while I know that many serious bodily evils and even deaths, have resulted from its employment. The whole theory is founded upon assumption, contrary to common sense and entirely opposed to all known principles of physiology. Every physician of experience, has met with numerous cases of cutaneous emptions, erysipelas and syphilis, which were directly traceable to vaccination, and if these cases could be collected and presented in one report, they would form a more terrible picture than the worst that has ever been drawn of the horrors of smallpox." — Dr. Robert A. Gunn, MD, Dean of the United States Medical College of New York

"Vaccination is a monstrosity, a misbegotten offspring of error and ignorance; and, being such, it should have no place in either hygiene or medicine... Believe not in vaccination, it is a worldwide delusion, an unscientific practice, a fatal superstition with consequences measured today by tears and sorrow without end." — Dr. Carlo Ruta, Professor of *Materia Medica* at the University of Perugia, Italy, 1896

"Vaccination is a grotesque superstition." — Dr. Charles Creighton, MD, MA

"Vaccination is a gigantic delusion. It has never saved a single life. It has been the cause of so much disease, so many deaths, such a vast amount of utterly needless and altogether undeserved suffering, that it will be classed by the coming generation among the greatest errors of an ignorant and prejudiced age, and its penal enforcement the

foulest blot.” — Alfred R. Wallace, LLD DUBL., DCL OXON., FRS, 1898 20th Century (1900’s)

“The great epidemics of deadly diseases, in animals and mankind, are caused by vaccination.” — Charles M. Higgins, author of *The Horrors of Vaccination: Exposed and Illustrated*, 1920

“I believe vaccination has been the greatest delusion that has ensnared mankind in the last three centuries. It originated in FRAUD, ignorance and error. It is unscientific and impracticable. It has been promotive of very great evil, and I cannot accredit it any good.” — Dr. R. K. Noyse, MD, Resident Surgeon of the Boston City Hospital, author of *Self Curability of Disease*

“The chief, if not the sole, cause of the monstrous increase in cancer has been vaccination.” — Dr. Robert Bell; Vice President, International Society for Cancer Research, British Cancer Hospital, 1922

“Vaccination is the most outrageous insult that can be offered to any pure-minded man or woman. It is the boldest and most impious attempt to mar the works of God that has been attempted for ages. The stupid blunder of doctorcraft has wrought all the evil that it ought, and it is time that free American citizens arise in their might and blot out the whole blood poisoning business.” — Dr. J.M. Peebles, MD, MA, PhD, author of *Vaccination: A Curse and Menace to Personal Liberty*, 1900

“Cancer was practically unknown until the cowpox vaccination began to be introduced. I have seen 200 cases of cancer, and never saw a case in an unvaccinated person.” — Dr. W.B. Clark, MD, Indiana, *New York Times* article, 1909

“At present, intelligent people do not have their children vaccinated, nor does the law now compel them to. The result is not, as the Jennerians prophesied, the extermination of the human race by smallpox; on the contrary more people are now killed by vaccination than by smallpox.” — George Bernard Shaw, Author and Playwright, 1944

“The English Ministry of Health omits to state that in 1872, when 85% of the infants born were vaccinated, there were 19,000 deaths from smallpox in England and Wales. While in 1925, when less than half the children born were vaccinated, there were only 6 deaths from that disease.” — Dr. Eleanor McBean, PhD, ND, author of *The Poisoned Needle*, 1957

“Vaccination causes miscarriage. A careful check showed that 47% of women who had been vaccinated in the second or third month of pregnancy, failed to give birth to a normal child.” — Vaccination at Work, The Consulting Pediatrician of Lanarkshire County Council, *The Lancet* (London), p.47, December 6, 1952

“My honest opinion is that vaccine is the cause of more disease and suffering than anything I could name.” — Dr. Harry R. Bybee

“Vaccination, instead of being the promised blessing to the world, has proved to be a curse of such sweeping devastation that it has caused more death and disease than war, pestilence, and plague combined. There is no scourge (with the possible exception of atomic radiation) that is more destructive to our nation’s health than this monument of human deception-this slayer of the innocent-thiscripler of body and brain-the poisoned needle.” — Dr. Eleanor McBean, PhD, ND, author of *The Poisoned Needle*, 1957

“The greatest LIE ever told is that vaccines are safe and effective.” — Dr. Leonard Horowitz, MPH (Master of Public Health), DMD, MA, Harvard University graduate 21st Century (2000’s)

“The entire vaccine program is based on massive FRAUD.” — Dr. Russell L. Blaylock, M.D., neurosurgeon, editorial staff of *Journal of American Physicians and Surgeons*

"Vaccinations do not work. They don't work at all." — Dr. Lorraine Day, MD

"Vaccinations are now carried out for purely commercial reasons because they fetch huge profits for the pharmaceutical industry. There is no scientific evidence that vaccinations are of any benefit." — Dr. Gerhard Buchwald, MD, author of *Vaccination: A Business Based on FEAR*

"Don't get your flu shot." — Dr. Raymond Francis, D.Sc., M.Sc., RNC, chemist, MIT graduate

"My own personal view is that vaccines are unsafe and WORTHLESS. I will not allow myself to be vaccinated again. Vaccines may be profitable but in my view, they are neither safe nor effective." — Dr. Vernon Coleman, MB, ChB, DSc (Hon)

"Everyone who is vaccinated is vaccine injured-whether it shows up right away or later in life." — Dr. Shiv Chopra, B.V.S., A.H., M.Sc., PhD, Fellow of the World Health Organization, former senior scientist at Health Canada

"The pediatrician indoctrinates your child from birth into a lifelong dependency on medical intervention. The first stage of indoctrination is the 'well-baby' visit. The well-baby visit is a cherished ritual of the pediatrician that enhances their income and does nothing constructive for your child. It's a worthless visit." — Dr. Robert Mendelsohn, MD, board certified pediatrician

"Vaccines are the backbone of the entire Pharmaceutical Industry. If they can make these children sick from a very early age, they become customers for life. The money isn't really to be made in the vaccine industry. The money is made by Big Pharma with all of the drugs that are given to treat and address all of the illnesses that are subsequent to the side effects of vaccines." — Dr. Sherri Tenpenny, D.O.

"Studies are increasingly pointing to the conclusion that vaccines represent a dangerous assault to the immune system leading to autoimmune diseases like Multiple Sclerosis, Lupus, Juvenile Onset Diabetes, Fibromyalgia, and Cystic Fibrosis, as well as previously rare disorders like brain cancer, SIDS (Sudden Infant Death Syndrome), childhood leukemia, autism, and asthma." — Dr. Zoltan Rona, M.D., author of *Natural Alternatives to Vaccination*

"The vaccine industry is itself a FRAUD. I spent my whole career studying vaccines." — Dr. Shiv Chopra, B.V.S., A.H., M.Sc., Ph.D., Fellow of the World Health Organization, author of *Corrupt to the Core*

"The greatest danger to your health is the doctor who practices modern medicine." — Dr. Robert Mendelsohn, MD, board certified pediatrician

Here are more testimonials from the book *The Poisoned Needle* by Eleanor McBean (1957):

"I have been a regular practitioner of medicine in Boston for 33 years. I have studied the question of vaccination conscientiously for 45 years. As for vaccination as a preventative of disease, there is not a scrap of evidence in its favor. Injection of virus into the pure bloodstream of the people does not prevent Smallpox. Rather, it tends to increase its epidemics and makes the disease more deadly. Of this we have indisputable proof. In our country (U.S.) cancer mortality has increased from 9 per 100,000 to 80 per 100,000 or fully 900 per cent increase, within the past 50 years, and no conceivable thing could have caused this but the universal blood poisoning now existing." — Dr. Charles E. Page, Boston

"After collecting the particulars of 400,000 cases of small pox I am compelled to admit that my belief in vaccination is absolutely destroyed." — Professor Adolf Vogt, who held the chair of vital Statistics and Hygiene in Berne University for 17 years

"I have very little faith in Vaccination even as modifying the disease, and none at all as a protective in virulent

epidemics. Personally, I contracted smallpox less than six months after a most severe re-vaccination.” — Dr. L Hall Bakewell, Vaccinator General of Trinidad

“Vaccination is the infusion of contaminating element into the system, and after such contamination you can never be sure of regaining the former purity of the body. Consumption follows in the wake of vaccination as certainly as effect follows cause.” — Dr. Alexander Wilder, Editor of the New York Medical Times, Professor of Pathology at the United States Medical College of New York and author of Wilder’s History of Medicine

“Vaccination does not stay the spread of smallpox nor even modify it in those who get it after vaccination. It does introduce into the system, and therefore contributes to the spread of, tuberculosis, cancer and even leprosy. It tends to make more virulent epidemics of smallpox and to make them more extensive. It does just what inoculation did – cause the spread of disease.” — Dr. Walter M. James, Philadelphia

“I can add my testimony to the others... that vaccination contributes to the great increase in cancer.” — Dr. Forbes Laurie

“We have no proof of the boasted effectiveness of any form of anti-toxin, vaccine or serum. The true figures on vaccination for smallpox have never gotten before the public, though they can be seen in the files of the various departments of the Army as well as the government, if one cares to look for them. If the record of vaccination in the Philippines alone were ever to become a matter of general knowledge it would finish vaccination in the whole country, at least among those who are able to read and think for themselves. After three years of the most rigid vaccination, when every Philippino had been vaccinated from one to six times, there occurred the severest epidemic of smallpox that the Islands had ever seen, with a death-rate running in places to over 70 per cent, and in all, well over 60,000 deaths. Is it any wonder the public is getting a little suspicious of us and our vaunted ‘medical discoveries?’ The wonder to me is that there are still millions of them willing to submit to vaccination and serum treatment.” — Dr. William Howard Hay, Buffalo, New York

“What hope is there for medical science to ever become a true science when the entire structure of medical knowledge is built around the idea that there is an entity called disease which can be expelled when the right drug is found?” — Dr. John Henry Tilden, M.D., author of Toxemia Explained

“There is no question but that perfect sanitation has almost obliterated smallpox, and sooner or later will dispose of it entirely. Of course, when the time comes, in all probability the credit will be give to vaccination.” — Dr. John Henry Tilden, M.D., author of Toxemia Explained

“It is simply no longer possible to believe much of the clinical research that is published, or to rely on the judgment of trusted physicians or authoritative medical guidelines. I take no pleasure in this conclusion, which I reached slowly and reluctantly over my two decades as editor of The New England Journal of Medicine” (1).

More recently, Richard Horton, editor of The Lancet, wrote that “The case against science is straightforward: much of the scientific literature, perhaps half, may simply be untrue. Afflicted by studies with small sample sizes, tiny effects, invalid exploratory analyses, and flagrant conflicts of interest, together with an obsession for pursuing fashionable trends of dubious importance, science has taken a turn towards darkness” (2).

and furthermore:

“The medical profession is being bought by the pharmaceutical industry, not only in terms of the practice of medicine,

but also in terms of teaching and research. The academic institutions of this country are allowing themselves to be the paid agents of the pharmaceutical industry. I think it's disgraceful" Dr Relman former chief editor for the New England Journal of Medicine.

"I firmly believe that if the whole materia medica, as used now could be sunk to the bottom of the sea, it would be all the better for mankind and all the worse for the fishes" (Holmes, 1891:19).[10]

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6060929/>

"Consider that the body can observe another body and learn how to detoxify his/her own body. For instance, if I see how someone else's body is detoxifying through a skin rash, my own body may learn the processes by observing another's body in action. This occurs by observing with our 5 senses, specifically our eyes, which transmits energy throughout the nervous system that can inform cellular behavior. However, this will ONLY occur if detoxification is needed by the body. In a child, this is much more likely as their bodies are still forming and the immune system is learning and strengthening. Note: Immunity comes from a relationship with microbes, which is developed at an early age when children begin sticking their fingers in their mouths, etc. If we prevent this, this relationship will be hindered.

The microbial and cellular functions in the body are intelligent and alive and can be informed via the 5 senses of the body. But it is not entirely down to touch or sight—It is reliant upon if there is a toxic accumulation in the body, and only then will such processes likely be signaled to occur. One way I can prove this is through mass hysteria, and the 'row of dominoes' effect that plays out during pandemics. Fear, for example, can bring about bodily changes that were on the precipice of occurring anyway. So then, the mind and body are powerful.

This is merely one way detoxifications can occur. Of course, if a toxic accumulation is too strong, it will be forced to do it eventually anyway. However, observation of another's body is helpful in teaching our own body how it can detoxify.

Also, do not rule out coincidence; the illusion of viral activity."

Jeff.G.

Dr. William P. Trebing says this in the book Good-Bye Germ Theory:

"The Human body's energy fields are more powerful than most can even imagine. When one Human body is detoxing, an almost magnetic effect radiates out from such individuals causing the same purifying effects in the immediate environment of people around them. We are not witnessing epidemics or contagious infections; we are witnessing a group healing process which is totally natural to our species." We can also perhaps compare it to how women all living in the same house synchronise their menstrual cycles.

This, from the video 'Germ Theory Deception Part 2', can also help us understand what is occurring – Alex Loglia reciting the work of Dr. Bill Holub: "What is really happening with these supposed epidemics is the following. Actually the word epidemic from the Greek, means literally on or at and people. And means something that happens to people as a group all at once – NOT a slow contagion. The actual epidemic process is very simple – remember that everyone already has their daily compliment of germs and remember also a large population of people, such as a town or a region of a city, is continually being exposed to the same environmental hazards all at the same time. For example large numbers of people are exposed to the same weather changes, water quality changes, pesticides, foods and water, contaminated food of a fast food chain, bad news in the media, batches of drugs and medication, holiday moods, air quality changes and many other toxic insults.

The, quote on quote, group healing reaction to these toxic challenges is what you are seeing when people start coughing, sneezing or whatever. They are not catching it from each other. They are experiencing it with others. In

addition, at many levels, we are all connected. About the only thing that is catching about all of this is paranoia. After all, medicine has had about a century to literally instill the fear of germs into our culture. So people fear the germs in the air, in the water – they fear germs from touching people, which, in turn leads to our general fear of people. When they read or see reports about infections going around, so to speak, the fear, paranoia and anticipation has been shown to lower 'immunity' and precipitate illness – now isn't that interesting. Our self imposed stress about holidays has the same effect."

Source: In a Strange Land - <https://www.youtube.com/channel/UC-0eHMmvEc6dI-GLuxjWyA>

"The case against science is straightforward: much of the scientific literature, perhaps half, may simply be untrue. Afflicted by studies with small sample sizes, tiny effects, invalid exploratory analyses, and flagrant conflicts of interest, together with an obsession for pursuing fashionable trends of dubious importance, science has taken a turn towards darkness..."

"The apparent endemicity of bad research behaviour is alarming. In their quest for telling a compelling story, scientists too often sculpt data to fit their preferred theory of the world. Or they retrofit hypotheses to fit their data. Journal editors deserve their fair share of criticism too. We aid and abet the worst behaviours. Our acquiescence to the impact factor fuels an unhealthy competition to win a place in a select few journals. Our love of 'significance' pollutes the literature with many a statistical fairy-tale...Journals are not the only miscreants. Universities are in a perpetual struggle for money and talent..."

"You have to understand that as I cut my teeth on this research, I realized that a disease could be invented. The suffering that goes with illness is very real, but the labeling of that suffering is one of the great and perverse powers of the medical cartel.

Because if you can name VARIOUS AND DIVERSE suffering that comes from many different causes and put it under one umbrella, one title, you can later claim you have found the one cause of the one disease, a cause that is a germ. And then you can find a drug which you say will kill the germ.

That is the pattern."

Jon Rappoport from the book AIDS INC.

Source: <https://jaxkeen.weebly.com/blog/aids-inc-jon-rappoport-pdf>

## DEDICATION

WHAT more can be asked by any doctor or layman than a philosophy of the cause of disease that gives a perfect understanding of all the so-called diseases?

To know cause supplies even the layman with a dependable knowledge of how to avoid building disease, and how to cure. When people know how to avoid disease they know an immunization that immunizes rationally.

Dependable knowledge of what disease really is and its cause is man's salvation; and when it can be had with no more effort than that required to read carefully and understandingly Toxemia Explained, there is little excuse for anyone, lay or professional, to live in ignorance of it.

Knowledge is power. Knowledge of how to have health gives greatest power.

Few people know anything about the cause of disease. To them this book is dedicated and the freedom from medical superstition it will bring them.

—J. H. TILDEN.

Source: <http://aconc.com/020103toxemia.pdf?fbclid=IwAR2lZQOHE81DtJrrzrgO6fGWAHqhkuRush3WfZRTyQSI Taq-2mo4n5sUCyc>

"The days for reductionist deconstruction are numbered; more holistic and integrated systems approaches are required to put Humpty Dumpty back together again. It is time for physiologist to return to their roots and consider the organism as a whole as advocated by Claude Bernard."

**"There will be, in the next generation or so, a pharmacological method of making people love their servitude, and producing dictatorship without tears, so to speak, producing a kind of painless concentration camp for entire societies, so that people will in fact have their liberties taken away from them, but will rather enjoy it, because they will be distracted from any desire to rebel by propaganda or brainwashing, or brainwashing enhanced by pharmacological methods. And this seems to be the final revolution" — Aldous Huxley**
