

Bios

Dr. Charlemange Akpovo is a physicist with expertise in laser-produced plasmas, utilizing fast and ultra-fast high-power laser beams. From 2006 to 2024, he conducted and coordinated research activities for numerous scientific grants at Florida A&M University (FAMU). While coordinating research and program services for the NSF HBCU-UP Science Community for Active Learners to Enhance Achievement and Retention (SCALAR II) STEM research education grant at FAMU from 2019 to 2021, Dr. Akpovo continued conducting scientific research part-time. His experience with this grant sparked a strong interest in program evaluation, which led to an opportunity to step into the field as an independent contractor with Quality Measures LLC (QM) from 2019 to 2024. In 2024, Dr. Akpovo joined the QM team as a Program and Project Evaluator.
