

Survey questions

While reviewing the survey questions document, please keep the following notes in mind:

- The questions reflect the already approved story angle and sample copy; revisions to the story angle and/or sample copy will need to be vetted by the We are Talker editorial account manager for news credibility before the survey questions are modified
- This draft of the survey questions is considered the strongest version possible, based on the shared information between the client and We are Talker
 - Any significant changes will need to be approved by the Talker editors to ensure we still have a strong, newsworthy story that complies with market research standards and best practices
- Once approved, our market research division, Talker Research, will review the survey
 - Their team members are members of the Market Research Society (MRS) and the European Society for Opinion and Marketing Research (ESOMAR); they will ensure the questions are written in a way that is fair, unbiased and not leading
 - This includes adding routing, N/A options, etc. as they deem necessary to ensure respondents are best able to answer the survey
- Talker Research's changes will be shared with the client for a final review, but client edits that go against market research standards will not be allowed; the survey must adhere to the MRS code of conduct to be sent to our panel of respondents
- If a specific, niche sample is needed for the survey, screener questions will be added to the top of the document — these do not add to the question total and are not editable; they are added to ensure we target the right group of respondents

Occasionally, the media may contact us wanting to interview respondents in the survey for further information to boost the article with qualitative data. These experiential quotes are used to add something unique to their reporting and boost the authority of the story which can then aid SEO performance.

To facilitate this, we sometimes ask respondents if they're open to being contacted by the media for further interview. This consent must be gained prior to running the survey. This enables us to share certain respondents with the media in adherence with our data protection protocols. Please note, a respondents' answer to this question does not impact their eligibility for the survey in any way.

1. **We're looking to hear from people about their perspective on youth sports. If you consent, you may be contacted for a short interview by phone or email from a journalist for further comment.
