

# Assessing Math Levels

## Sue's Favorites

3rd, 4th, 5th quick pre-assessment by teacher. The 2<sup>nd</sup> version does not include the grade levels. A tutor could see how far a student can go with the problems and isolate areas of strength and weakness.

Example: Has both copy for students with problems and the answers are in another document

## Other Good Assessments

Another option of an in-depth assessment from which tutors can select items
