

Tverečius RCC Death Register Entry Data Table for 1891-1904

(selected entries from 1891-1904 Tverečius RCC death register (LVIA record F.1332 Ap.1 B.26))

[This Table was last updated on 21 Oct 2018]

General. This Register Entry Data Table (REDT) contains translations / transcriptions of the primary names, dates, and places recorded in *selected* entries in the online 1891-1904 death register of Tverečius Roman Catholic church (RCC). Tverečius is a town in Lithuania; it is in the Ignalina municipality in Utena county. The translations are necessary because the entries in this Tverečius RCC register were about ethnic Lithuanians but the entries were not written in the Lithuanian language.

Source Citation: Tverečius RC Church death register, 1891-1904 (LVIA# 1332-1-26)

Source Citation Detail: Image __ of 204, entry __.

Note: This 1891-1904 Table covers the register period from 5 Aug 1891 through 15 May 1904. This 1891-1904 Table is a "short form" that has rows only for those register entries where at least the surname of the decedent has been transcribed and/or translated from the register; there are no blank rows for the other entries.

Selection of Entries for Inclusion in Table. This Register Entry Data Table contains only a *selected* subset of the entries in this online Tverečius RCC death register. My primary objective is to eventually include every entry where the decedent has one of my ancestral surnames. My ancestral surnames within Tverečius RC parish are: *Čepulis, Klonis, Kondratavičius, Kudaba, Lukšas, Lukšėnas, Maciukas, Pauliukėnas, Stasiūnas, Telyčėnas, Vitėnas*. Many additional entries are also included for various reasons.

Languages. The entries in this death register are *handwritten* in the Russian language. In the Table below: the names of Lithuanian people and places are in modern Lithuanian; any text *transcribed* from the register entries is enclosed in parentheses; and all other information is in English.

"Reverse Translation". In general, the names of ethnic Lithuanian people and places were often "Polonized" (converted into Polish-language versions of the names) by the priests who entered the names in the RCC registers, and the names were *trans-literated* into Russian for entry in the Russian-language register. When translating register entries, Lithuanian genealogists attempt to reverse the original conversion process; they attempt to convert the Polonized names back into corresponding Lithuanian-language names, and they use the surname suffixes of modern Lithuanian. The Lithuanian names that appear below in the Register Entry Data Table have been converted / translated from the Polonized names back into Lithuanian names. This process is relatively straightforward for *place* names and *given* names, but the translation of *surnames* can be highly subjective, and alternative similar surnames are often possible.

Transcribed Text. In the Register Entry Data Table, the names and selected words that are *enclosed in parentheses ()* are my transcriptions of the handwritten names and words as they appear in the register entries [with some exceptions as explained in the Generic Endnotes to the Tables]. [The general exceptions: The surnames of the fathers of deceased children and the husbands of deceased wives are typically in the Genitive-case plural-form in the actual register, but the *suffixes* of the transcribed surnames in the Table below have been adjusted to show instead the Nominative-case singular-form.]
