

TRIBUTE LABS

Full Stack Engineer

[Tribute Labs](#) is seeking a talented individual to join our team to help support a curated network of decentralized autonomous organizations (DAOs). We're passionate about revolutionizing online communities and building truly autonomous DAOs, using AI and other innovative tools. At Tribute Labs, we are deeply committed to a vision where DAOs are more than just crypto and help enable people to do more together online.

Tribute Labs supports some of the largest and most successful DAOs, including [The LAO](#), [Flamingo DAO](#), [Neon DAO](#), [Red DAO](#), [Ready Player DAO](#), [Noise DAO](#), [Dark Horse DAO](#), [Spaceship DAO](#), [Unicorn DAO](#), [Bright Opportunities DAO](#), [Si DAO](#), [Glimmer DAO](#), [Beaker DAO](#), [Punk DAO](#), [Zero DAO](#), [Labyrinth DAO](#) and [Metropolis DAO](#). These DAOs have invested in over 300 projects, often at the seed/pre-seed stage, and collected tens of thousands of digital objects.

Now, we're seeking a Full Stack Engineer to continue to support the network of DAOs.

The Role

We're an optimistic and thoughtful team, who have been working on Ethereum since its inception. We're looking for a talented, hungry, and eager full-stack engineer who wants to sit on the bleeding edge of crypto and change the way people organize on the Internet.

We understand that the Web3 stack is maturing. If you have experience, great! If you don't, no sweat – in this role, you'll learn how to work in a Web3 environment and build critical components of it. If you want to jump into the heart of DAOs, investing, and collecting, we're the team for you.

Who You Are:

- Eager to be a part of a rapidly growing team with a desire to support the vision of mobilizing online communities through innovative tooling, including AI-powered automation
- Able to quickly adapt, open to learning, and excited to contribute
- Confident taking on an ownership mindset and driven to maintain a strong record of successfully accomplished projects

- Comfortable working in a fast-paced, highly collaborative environment with an emphasis on cross-team communication and moving fast
- Passionate about our mission with a desire to make a meaningful contribution to the world

The Role:

In this role, you'll have a great degree of responsibility and ownership over your work product and the ability to weigh in on the creation, design, and execution of future products.

Our ideal candidate has:

- Fluency in Typescript, with bonus points for Solidity.
- Owned, or who wants to own, the full stack.
- Curiosity and a willingness to learn and understand blockchain technology and related tooling.
- The ability to work remotely (we're a remote-first company)
- Ability and curiosity to use AI based coding tools such as Co-pilot and others

If you don't meet this ideal, know we believe deeply in training and development and will give you some flexibility to pick up any skills you may need for the role.

Compensation and Benefits

We reflect our commitment to our team in the compensation package for this role. We pay competitive annual salaries, offer full benefits, including medical, dental, vision, 401k, and have a flexible vacation policy.

Please note, our team is only considering candidates based between PST and EST. Being in NYC is a plus!
