

DISCLAIMERS

A huge thanks to everyone who have helped me on creating this list. Here's the complete [Credit List](#).

Please, check [these folders to see the complete list](#). Each page corresponds to a **different Hidden Suit**. These all have images.

You can also see [our summary](#) of this list, which is way more compiled and probably easier to read, though you'll lose a lot of information if you only read that one. **This doesn't have any images.**

If there are any mistakes on the suits or if there are other suits not placed there, please redirect yourself to the [main page on Reddit](#)! I'd deeply appreciate it if you could leave a helpful message there!

EXPLANATIONS

“Hidden Suits” are suits that exist in the game, but don't appear as a full suit in the Gallery. These parts are known to be put together because of their **Names, Descriptions** and/or matching **colors/designs**. They're also known as Unofficial Suits and Non-Achievement Suits.

*Some of these parts are still unknown to be indeed a part of the suits listed here. In that case, there will be a message saying so right below said part.

*If you disagree with what was written and/or have proof of a specific item being part or not of said suit, please let me know by commenting. In this case, please give me some proof of that.

“Galery Suits” are the suits that officially exist in the game and appear in the Gallery.

*If a suit has a recolor shown in the gallery, the recolor is also considered a gallery suit.

The list is separated with **Folders**. There are **4 Main Folders**:

- **Full Hidden Suits:** For a suit to be here, it needs to have 5 or more items, and there has to be included at least one of each: **Hair**, **Tops&Bottoms/Dress**, and **Shoes**. This is more specified on the list.
- **Coordinating Items:** These are sets that mostly have coordinating items which would go together, but wouldn't be enough to complete a suit (different from the Full Hidden Suits).
- **Monthly Sign-In Suits:** These are all suits we get from **Monthly Sign In**. If a Monthly Sign In suit configures a **true suit** in the game, then it **won't** be displayed here. Remember, this is a Hidden Suits list!
- **Pre-Evolution Suits:** These suits are the **Pre-Evolution suits**. This means that all the suits in this section were **gotten from stages, crafted, bought or evolved while trying to achieve a TRUE SUIT from the game**. This is more specified on the list.
- **Dream Weaver Hidden Suits:** For a suit to be here, it needs to be given out to us by the **Dream Weaver NPCs**.

There also may be up to **3 Documents** in the Full Hidden Suits and Coordinating Items folders:

- **Suits With Official Names:** These suits have **official** names. This means that these suits have already received an official name from Elex through their Facebook page or through the game.
- **Suits With Unofficial Names:** These suits have **unofficial** names. This means that these suits haven't received an official name from Elex through their Facebook page yet or through the game. So, the names here can come from one of these 2 sources:
 - 1- The name of that suit is known in the community somehow, or people have started calling it like that.
 - 2- The name of that suit was officially given to the suits on other servers, such as Vietnamese and Chinese ones. Then, they were translated and put here to make it easier to find the suit.
- **Suits With No Names:** These suits **don't have any official or unofficial names**. This means that these suits haven't received an official name from Elex through their Facebook page or through the game yet.

*If there are no Sub-Folders, then there are no other separations on the list.

There are **NO spoilers** on the list. I will not accept images from Hidden Suits that are still going to appear in the game. I will only accept Hidden Suits that already are in the game.

HOW TO HELP

If you want to help me by sending a picture, please follow these rules:

- If you're taking a **screenshot of a completed suit**, please make sure to use the same background and pose (to the left) as I'm using here.
 - Also, make sure **not** to use the screencap function of your cell phone. Use the **in game "Share>Screenshot" option** and get the image from your cell phone files. For that, do as follows:
 - Open your file manager > Go to Internal Storage > Android Folder -> data -> com.elex.nikkigp -> files -> pictures
 - In the Android folder, there's a lot of folders called com.____ , so you need to pay some attention to find the right one. You need to move them to your images folder to see them in the gallery, if you have to.
 - Please, try **not to move Nikki around**. Otherwise, let her be in the position the game leaves her. Her body must not be touched.
 - If you're creating an image that has Foreground/Background/Similar parts that aren't fixed with Nikki's position when you turn her around, please **try not to move them**. If the items are shown in front of Nikki, please just move her forward. If the items need to be moved another way, please do it in a way that people will understand how it works.
 - Also, please, if you don't have all the items to that suit, try not to send an image of an incomplete suit. I unfortunately won't be able to put your image on the list, because it confuses people. Thanks for understanding.
- If you're taking a **screenshot of a suit that doesn't have Tops&Bottoms/Dresses**, you'll need to use something else.
 - In that case, I will only accept the **Ring Bikini Top and Bottom parts** as a way of saving this screenshot.
 - This choice was made because this Bikini is one of the less covering items in the game, so this won't change much of any other items shown here. Also, it's an item that people generally get early in the game.
- If you're taking a **screenshot of a suit that doesn't have a hair piece**, you'll need to use **Nikki's original hair (Nikki's Pinky)**.
- If you're taking a screenshot of a piece from the Wardrobe, please send it complete (you can cut the top of the screenshot though, where the Stamina/Gold/Dias counters are).
 - I'll need it complete in order to cut it manually on the list, in order for the pattern to keep existing.
 - I appreciate your thoughts of editing the images beforehand, I know that people who do this often are trying to be generous, but most of the time it only wastes your time, and gets me in trouble while trying to add it to the list.
 - Don't worry, the process of editing these images directly on the sheets is actually easy. Thanks for your cooperation on this!
- Send it to me by posting the images on <http://imgur.com/> and commenting the link on [our post on Reddit](#). (this will make sure the quality is okay! <3)
 - Otherwise, if you want to send them to me one by one/all at once, you can talk to me via Discord [@Soul_Wade#2052](#).
 - You can also send the images by entering our [Discord server!](#) We have a lot of nice people there who always try to help as much as they can, you'll be welcome to join us as well!
- I give credits to everyone who helps on building this list. If you don't say your in game name (IGN), I'll credit you with your Reddit Username or Discord nickname. The Credit List can be found [here](#).
- Thank you for your help on building this list!

For the reason of keeping a pattern in this list, I will only accept images that are according to the rules above. Thanks for your patience and understanding. <3

PINTEREST LINKS

I know Pinterest isn't the best option when it comes to image hosting, since it's only really good if you have an account on it. But, unfortunately, it's the best way for me to keep updating this stuff, since otherwise it would make me create new links every time I try to add more useful stuff onto the lists. I'm sorry to everyone who hoped for other kind of links, but that's the only way I'm currently able to create groups of images like these. I realize it's not the best ever, but it's the best possible for me at the moment. Sorry about any issues involving that.

Anyway, here are some useful Pinterest images I've personally collected to prove some of the suits added to this list (proof of them being really Hidden Suits):

[Hidden Suits in LN](#)

[Monthly Sign-In Suits](#)

[Dream Weaver Hidden Suits in LN](#)
