

## Giant Nugget Box

*D'Anne Ward  
Scrappy Girl*

Cut cardstock to 5-1/4" x 10-1/2". Score at 1/2" and 1" on all 4 sides. Cut out the corners as shown and fold into a box shape as shown below.

Divider insert

Cut cardstock 3" x 10-1/4". Score at 3-1/4", 3-3/4", 4-1/4", 5-3/4", 6-1/4", 6-3/4". Fold with peak and valley style as shown above. Adhesive the peaks so they stay up. You can put adhesive under the divider if you want but it isn't necessary and no, it does not fit tight, it just sits in the box.

### Transparency Sheet Slider

Cut transparency paper to 8-1/2 x 8-3/8. The scoring measurements are a little odd but keep in mind the box is 1/2" tall by 3-1/4" wide so these measurements are just a fraction over those sizes.

Score at 1/2", 3-13/16, 4-3/8", 7-11/16".

It's kind of hard to fold this paper unless you score it well. Unfortunately there is a fine line between scoring it perfectly and scoring through it! :) Add Sticky Strip to one end and attach to the other.

Looks like this now.

Slide the box inside and you've got it!
