

No Texting While Driving App 2022

HARMONY SCHOOL OF DISCOVERY - HOUSTON

School Address: 6270 Barker Cypress Rd, Houston, TX 77084

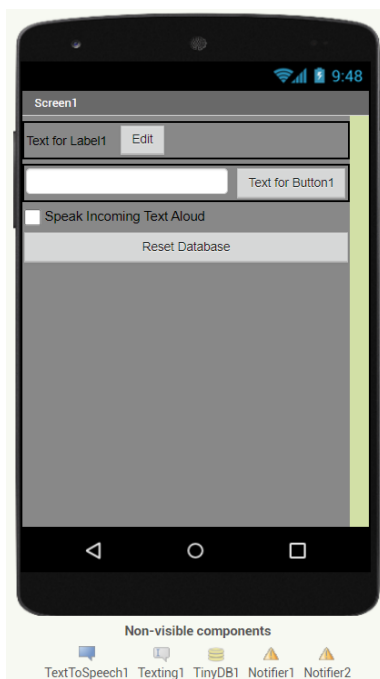

Phone: (281) 861-5105

Introduction

Our project is a No Texting While Driving App. Texting and driving causes drivers to lose focus, and it causes accidents. This can sometimes lead to the death of the driver, any passengers, or the occupants of the other car(s). In the year 2020, over 3,000 people were killed because of distracted driving. Also, a study performed by the AAA Foundation in 2015, proved that 58% of teen crashes were caused by distractions, and that cell phone usage was the highest distraction. To help solve this dangerous issue, we made an app that drivers can use to minimize phone usage.

How does it work?

Our app has an automatic saved message that will be sent to anyone that texts the user while the app is running. The user will be able to customize their message as well, which will be stored in a database. The user can also choose to have an active text to speech component, which speaks the incoming message aloud. The app automatically responds to a text, which could greatly reduce driver distractions.
