

- **Assess the impact preparations can have on the wellbeing of the dependant**

Scenario One: Betty is a 90-year-old grandmother who is about to move in with her daughter, Kate, due to her decreased mobility.

Provide examples of the preparations Kate could make to prepare for her mother moving in. **Assess** the impact this would have on **Betty's** wellbeing.

Discuss your ideas as a group and add them to the following table:

Preparations	Examples (What can Kate do?)	Assess the impact on the wellbeing of the dependant (How will this impact Betty?)
Changing health behaviours		
Organising finances		
Modifying physical environment		
Enhancing knowledge and skills		

Scenario Two: Recently Angelina has decided she wants to adopt. She has contacted an agency which permits adoption of young children from South East Asia.

What preparations does Angelina have to consider and how would this support the child's wellbeing when adopted?

Preparations	Examples (What can Angelina do?)	Assess the impact on the wellbeing of the dependant (How will this impact her child?)
Changing health		

behaviours		
Organising finances		
Modifying physical environment
