

IXL Summer Skill Plan for Incoming 4th Grade Students

Dear Students,

Soon you will be 4th graders at Brooklake! To help you maintain the necessary skills from this past school year and ensure readiness for 4th grade, we are asking that you practice the **grade 3 skills** listed below on IXL. Please log into your IXL account through Clever.

Please follow the guidelines listed below as you practice this summer:

- You will have **IXL** access throughout the summer and can log in through Clever. You **MUST** log in each time you complete skills – if you do not, **your work will not be recorded as completed.**
- Practice every day (or almost every day).
- **Do NOT** work more than **20 minutes** at a time **OR** complete 20 problems per skill.
- If you are having trouble, **GET HELP** from an adult or older sibling.
- Some skills may be easy for you to do and will take less than 20 minutes – just keep going and complete as many skills as possible in the 20 minutes. Some may be more difficult and may have to be worked on for more than one day.
- You will need to use paper and pencil for some of the skill sets.
- There is a place value chart to help pay attention to regrouping and grid paper to help line up your work located at the end of this packet to assist you.
- If you get a problem wrong, **READ the EXPLANATION** to help you understand the skill.
- **Do NOT** wait until the last minute to complete this work. Pace yourself – set a schedule and stick to it. IXL provides you with a weekly pacing guide to help prevent “summer slide” and to help you manage your time.

NOTE: The recommendation for IXL is a maximum of 20 problems attempted on any one skill. Spend no more than 20 minutes a day. Just do your best!!

[This is a week-by-week skill plan! There are twenty skills.](#)

This assignment is due by: **Friday, September 13, 2024.**

OPTIONAL WORK:

IXL provides standards based skill practice which aligns with recommended IXL skills for each chapter of our Math in Focus Curriculum work.

Students should strive to complete as many of the skills listed in this plan for 20 minutes or work on a maximum of 20 problems per skill:
