

Outstanding people

Danila	Card №1 (2)	Do you know anyone who is a Nobel prize winner?
Alex	Card №1 (4)	My son wants to become a successful businessman in the future. What advice will you give him? Well, to start with I think that the most important thing for any successful business is the idea. After creating the idea you can start planning and finding money for your business. I would also like to say that by the word 'idea' I mean something more than just a desire to create business in some certain sphere but some kind of new format of business in that sphere or product. There is also one important thing for any kind of startups - you must have some friends with you or any people that can be trusted and which will help you and support your ideas. And the last and probably the most important thing - if you would really like to become successful businessman you'll have to never give up. Because there for sure might be some bad times for your business and you'll have to not only be master of oneself but also to inspire everyone around you to continue the struggle and develop the business.
Liza	Card №1 (5)	Some people say that great minds think alike. What do you think about it? This expression is used to suggest that both of the people are very intelligent because they are thinking the same thing. In my opinion, it doesn't mean that they have the same ideas or thoughts, obviously it means that their behavior is similar. Intelligent people usually defer judgment, look for what is not easily seen, they are kind and generous to other people etc. Although, these people are similar because they have achieved some great things in their lives. Probably all of them had motivation and never gave up. Moreover, such people don't blame others for their failures and work as hard as possible.
Denis	Card №2 (2)	Do you think a genius is born or made? First of all I think that the geniuses are made. You need to have two traits of character. Those are hard work and persistence. In my point of view some people were born smarter than other. But with hard work and persistence you can be whatever you want in the future. Some people want to become geniuses some want to become businessman or other. That's why I think that with due efforts you can be genius but off course if you want it. я лох
Edik	Card №2 (4)	Your British friend is interested in Russian and Belarusian literature. What kind of books will you advise him/her to read? First of all I can suggest many famous literature books written by russian writers. My friend can start reading easy books for children so I would

		recommend to read "Neznaika" by Nikolay Nosov. But if he is a well-read person he ought to choose some list of good books like "Dead Souls" by Gogol, "The idiot" by Fyodor Dostoevski, "War and Peace" by Tolstoy, "The crime and punishment" by Dostoevski (in that book you can see the perfect example of russian mentality).
Stephan	Card №3 (2)	Do you think a genius is born or made?
Dima	Card №3 (4)	Advise me on how to encourage my students to be more curious and hardworking.
Slava	Card №4 (2)	Do you think it is important to know the history of your country?
Ira	Card №4 (4)	Your British friend wants to learn more about the culture of Belarus. What advice will you give him/her? I'd advice him/her to attend different kinds of festivals, exhibitions, theaters, museums in Belarus. Also, can enjoy the performance of national and international dramas, ballets or listen to operas. One might spend an unforgettable time, engaging in festivities in ancient castles such as the Mirum music festival.
Julia	Card №2 (5)	Winston Churchill said: "Success is not final, failure is not fatal. It's the courage that counts." What do you think about it? It means that when you succeed in something, don't rest, this event is fleeting. But at the same time failure is inevitable from time to time. Nevertheless it helps you learn, that's why don't fear failure. Courage comes when you fall down several times, personal forces help you get back on your feet and win. So failure and hard work leads to success. One depends on the other.
