

Fun to work at web application startup (specializing in data visualization) looking for a talented web designer / developer to join the team.

Applicant must be able to take requirements, create UI mockups, pixel perfect design, and deliver solid web programming front end implementation in clean HTML / CSS with a knowledge of web standards (JavaScript and JQuery skills are a plus). This individual will be responsible for the look and feel, and taking design passes over the other coders' work. Position may be based out of Portland or Eugene OR (your choice). Position pays market rates along with health care benefits and flex time options. If you have the chops please send a resume and examples of your work to careers@deckmonitoring.com.
