

DataOcean DOTS-Mobile操作指南(中英文)

Guideline for DataOcean DOTS-Mobile

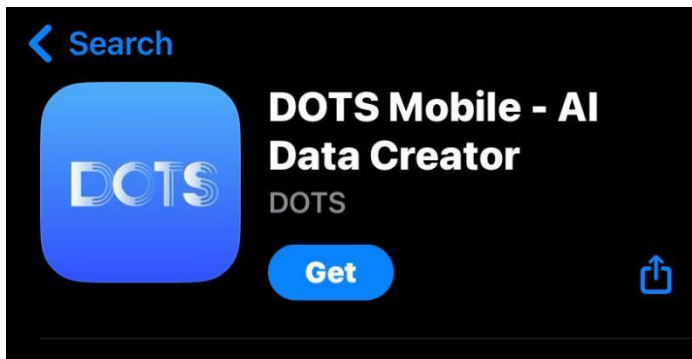

本应用主要用于录音项目的采集, 用户通过工作码加入项目后, 即可录音, 每录完一条数据, 将会对音频质量进行检测, 以提高音频的准确性。对于打回的音频, 支持重录, 同时用户可以实时查看自己的录音统计信息, 了解项目进展。

This application is primarily designed for the collection of recording projects. Users can join a project by entering a work code and then start recording. After each piece of data is recorded, the audio quality will be checked to enhance the accuracy of the audio. For audios that are returned, re-recording is supported. Additionally, users can view their recording statistics in real-time to understand the progress of the project.

3、录音流程介绍 Recording Process Introduction :

录音主要流程如下：

- 输入工作码，领取任务。(工作码由供应商或项目经理提供)
- 领取任务后，签署授权书;若之前签署过相同授权书，则不需要再次签署；
- 进入录音页面，正式录音，录音完成后提交任务；
- 提交任务后，数据将进入审核环节:若数据被打回，请重新录制;若审核完成，可在已完成任务列表查看。

The main recording process is as follows :

- Enter the work code to receive the task. (The work code is provided by the supplier or project manager)
- After receiving the task, sign the authorization letter; if you have previously signed the same authorization letter, there is no need to sign again:
- Enter the recording page and start recording officially. After completing the recording, submit the task;
- After submitting the task, the data will enter the review phase: if the data is returned, please re-record; if the review is completed, you can check it in the list of completed tasks.

具体流程图示如下 The process is illustrated in the following flowchart :

5、常见问题 common problem :

BUG1:领取任务后, 主页显示空白, 刷新不出来

解决方法:直接点击图中圈出来的空白区域

问题源头: 小米手机, 设置了个性化主题, 影响了录音软件显示, 如果上述方法无法解决, 可以尝试修改默认的主题设置;

****BUG1: After claiming the task, the home page displays a blank screen, and it cannot be refreshed.**

****Solution: Directly click on the circled blank area in the image.****

****Root Cause: Android phones, personalized theme settings have been applied, which affected the display of the recording software. If the above method does not resolve the issue, you can try changing the default theme settings.**

Notices :

Project Description :

- **1.1 Language: Malay and English**
Gender Ratio: 1:1 (male to female)
Sampling Parameters: 44.1kHz, 16-bit, mono, WAV file
Device: Mobile phone
Environment Requirements: Indoor quiet environment, no echo, SNR $\geq$ 30dB
Recording Requirements:
 - Noise reduction features on the recording device must be turned off.
 - Data with plosive sounds or noise will be rejected and considered invalid. Re-recording will be required.

Supplement:

- The 44.1kHz requirement must be the actual sampling rate. If the hardware device cannot achieve a true 44.1kHz spectrum, it cannot be used.
- Data with fake sampling rates will be rejected and considered invalid.

Supplement on Age Authenticity:

- The age information provided by participants must be accurate. If the voice does not match the reported age, we reserve the right to request the participant's ID and a recording video of the participant to verify their age.
