

AUTHORS INFORMATION

This page is an additional page and is not to be published. Please fill in the column below:

Author	WhatsApp number	Email address	Affiliation	Position/Occupation
1				
2				
3				
...				
...				
...				
...				

Notes:

1. Put a * mark after the name of the corresponding author
2. We will write the affiliation in Bahasa Indonesia, please use the new official name of your institution.

REVIEWERS INFORMATION

This page is an additional page and is not to be published. Sometimes, the research topic is very unique. Therefore, use this form to suggest suitable reviewers for your manuscript:

Suggested Reviewer's Name	WhatsApp number (if any)	Email address	Affiliation

Abstrak

Artikel dalam Journal of Telecommunication, Electronics, and Control Engineering (JTECE) memiliki dua buah abstrak. Abstrak yang pertama adalah abstrak dalam bahasa Indonesia, sedang yang berikutnya adalah abstrak dalam bahasa Inggris. Abstrak adalah bagian dalam artikel yang memiliki tidak lebih dari 200 kata. Abstrak menyebutkan tujuan dari studi, prosedur, hasil dan analisis/diskusi, dan kesimpulan. Abstrak ditulis dalam format gaya huruf Times New Roman dan ukuran 9. Abstrak diikuti dengan empat sampai delapan kata kunci untuk keperluan *indexing*. Kata kunci diletakkan secara berurutan sesuai dengan huruf alfabet dan dipisahkan dengan koma. Agar artikel anda diterbitkan dalam jurnal ini, anda perlu menggunakan file ini sebagai instruksi dan *template* sekaligus. Jika artikel anda tidak mengikuti format yang disebutkan, maka penulis akan diminta untuk memperbaiki artikelnya. Dalam artikel, penulis diminta untuk menuliskan dalam struktur berikut: Pendahuluan, Metode/Alogaritma/Prosedur, Hasil dan Pembahasan, Kesimpulan. .

Kata kunci: JTECE, Jurnal, Template

Abstract

An abstract of no more than 200 words should state the purposes of the study, procedures, findings, and conclusions. It should be written in Times New Roman with a font size of 9. Abstract should be followed by four to eight keywords to assist cross-indexing. The keywords should be ordered alphabetically and separated by commas. For your paper to be published in the journal, you must use this document as both an instruction set and as a template into which you can type your own text. If your paper does not conform to the required format, you will be asked to fix it. In the paper, authors are suggested to present their articles in the structure of the sections: Introduction - The Proposed Method/Algorithm/Procedure specifically designed (optional) - Research Method Results and Discussion - Conclusion. Authors may present complex proofs of theorems or non-obvious proofs of correctness of algorithms after the introduction section (obvious theorems and straightforward proofs of existing theorems are not needed).

Keywords: JTECE, Journal, MS-Template

1. INTRODUCTION

This demo file is a Template for the Journal of Telecommunication, Electronics, and Control System (JTECE) produced under MS. Word. This file is in English, but for now, ***JTECE receives articles in both Bahasa Indonesia and English***. The template describes the page style used in JTECE and sections that should be written in the manuscript. Authors who want to submit their manuscript to JTECE must follow this template. This is important to maintain the quality of the journal. Therefore, if one paper does not conform to the required template, the author will be asked to fix it.

A. Sub-section of Introduction

In the introduction, the context of the study and the state of the precise objective should be explained. An Introduction should contain the following three parts: background, the problem, and proposed solution. In explaining the background, authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the art of the field the report is about. The problems need to be described clearly so that readers are able to understand why they should proceed with reading. Authors also need to describe the proposed solution so that readers can point out the novel aspects of the authors' work. Authors should place the paper in proper context by citing relevant papers.

B. Page Layout and Style

The manuscript must use an A4 page size. The margins must be set: 30mm (1.18) for the top, 30mm (1.18) for the bottom, and 30mm (1.18) for each left and right margin. The manuscript also must be in a one-column format. All paragraphs must be indented. All paragraphs must be justified, i.e. both left-justified and right-justified.

Times New Roman or Times font should be used for the manuscript. Font size 10 is used in general, except for title (24), author name (11), abstract (9), and caption for figures and tables (9). More details on the font style used can be seen in Table 1.

Table 1. Font Size for Manuscripts

Front Size	Appearance (in Times New Roman or Times)		
	Regular	Bold	Italic
8	reference item		reference item (partial)
9	author email address, cell in a table, table caption, figure caption	abstract heading and body	
10	paragraph	level-1 heading (in Small Caps), level-2 heading, level-3 heading	author affiliation
11	author-name		
24	title		

All title and author details must be in single-column format and must be centered. Every word in a title must be capitalized except for short minor words such as “a”, “an”, “and”, “as”, “at”, “by”, “for”, “from”, “if”, “in”, “into”, “on”, “or”, “of”, “the”, “to”, “with”. To avoid confusion, the family name must be written as the last part of each author name (e.g. Mary J. Smith). Each affiliation must include, at the very least, the name of the company and the name of the country where the author is based (e.g. Telkom University, Indonesia).

C. Equation, Figures, and Tables

Number equations consecutively with equation numbers in parentheses flush with the right margin, as in (1). Be sure that the symbols in your equation have been defined before the equation appears or immediately following.

$$f(x) = a_0 + \sum_{n=1}^{\infty} \left(a_n \cos \cos \frac{n\pi x}{L} + b_n \sin \sin \frac{n\pi x}{L} \right) \quad (1)$$

Figures and tables must be centered in the column. Please check all figures in your paper both on screen and on a black-and-white hardcopy. When you check your paper on a black-and-white hardcopy, please Ensure that: the colors used in each figure contrast well, the image used in each figure is clear, and all text labels in each figure are legible. Figures must be numbered using Arabic numerals. Figure captions must be in 9pt regular font. Captions of a single line must be centered whereas multi-line captions must be

justified. Captions with figure numbers must be placed after their associated figures. Examples of a figure can be seen in.

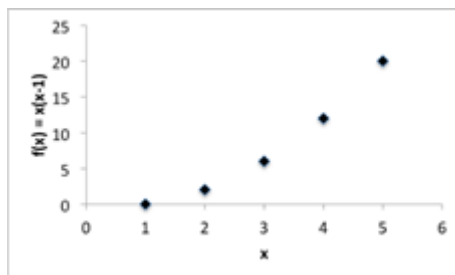

Figure 1. Example of a Figure

Tables must be numbered using uppercase Roman numerals. Table captions must be centered and in 9pt regular font. Every word in a table caption must be capitalized except for short minor words as listed before. Captions with table numbers must be placed before their associated tables, as shown in Tabel.1

II. LITERATURE REVIEW

Literature review could be written in the separated section or inside the introduction section. The aim is to show the readers that authors have read, and have a good grasp of, the main published work concerning a particular topic or question in the field. It is very important to note that the review should not be simply a description of what others have published in the form of a set of summaries but should take the form of a critical discussion, showing insight and an awareness of differing arguments, theories, and approaches. It should be a synthesis and analysis of the relevant published work, linked at all times to your own purpose and rationale.

III. RESEARCH METHOD

The presentation of the experimental methods should be clear and complete in every detail facilitating reproducibility by other scientists.

IV. RESULTS AND DISCUSSION

The presentation of results should be straightforward. This section reports the most important findings, including statistical analysis results as appropriate and comparisons to other research results. Results given in figures should not be repeated in tables. This is where the authors should explain in words what he/she/they discovered in the research in words. It should be laid out and in a logical sequence. This section should support suitable references.

V. CONCLUSION

Summarize sentences the primary outcomes of the study in a paragraph. Explain if the results support the claims in this section and if they seem reasonable. Also, describe whether the result support or contradicts previous theories and explain how the research has moved the body of scientific knowledge forward.

ASSOCIATED CONTENT

Associated content could be supporting information or supplementary information (SI), in detail procedures, or complete computer codes.

Supporting Information (or Supplementary information) is typically experimental details or additional data that cannot be included in the main article due to the length constraints or is “supplementary” to the necessary information presented in the main paper. SI is like *lampiran* in *karya ilmiah berbahasa Indonesia*.

ACKNOWLEDGMENT

The authors would like to thank Lembaga Penelitian X for the financial support (Proposal No. 123456).

AUTHOR CONTRIBUTION

TA constructed the study design. FA performed and analyzed the data. SA prepared the manuscript and revised the final version of the paper. TA and FA have read the final manuscript and approved the submission. FA, SA, and TA are the abbreviation of First, Second, and Third Author respectively.
