1. To Generate Channel Names:

Act as a creative director. Generate a list of 10 channel name ideas suitable for a YouTube Shorts channel. The channel's content is about a surreal, weird niche featuring fruits and foods with photorealistic human faces that react to bizarre situations. The names should be short, catchy, and slightly absurd.

2. To Generate Profile Picture Concepts:

Act as a brand designer. Brainstorm 3 distinct visual concepts for a YouTube profile picture logo. The channel is about surreal AI art of food with human faces, often showing disgust or annoyance. The logo should be simple, high-contrast, and immediately communicate the weirdness of the channel.

3. To Generate the Final Profile Picture Image: *(Use this as a follow-up after choosing a concept. This example assumes you chose a concept about a single piece of fruit.)*

That concept is perfect. Now, using DALL-E, generate a final profile picture image based on that. Create a high-quality, photorealistic image of a single, perfect [fruit]. The [fruit] has a detailed, photorealistic human face on it with an expression of pure

horror and disgust. The background should be a solid, contrasting black to make the image pop. The lighting should be dramatic, like a cinematic close-up.

4. To Generate Viral Video Ideas:

Act as a viral video concept creator. Generate a list of 10 unique video ideas based on the "food paradox" theme. The videos will be for a short-form content channel. Each idea should feature a sentient food item being forced to confront a version of itself being eaten. The core emotion to focus on is disgust, horror, or annoyance.

5. To Generate the Video Storyboard: *(Replace the bracketed text with your chosen idea.)*

1. Act as a film director and expert storyboard artist. Take all the previous video concepts and break it down into a scene, you must provide a detailed, visually rich description suitable for an AI image generator. Each scene description must include these four elements:
2. The Camera Shot (e.g., WIDE SHOT, EXTREME CLOSE-UP)
3. The Character's Expression & Action (e.g., The apple is smiling, the apple's eyes widen in horror)
4. The Lighting & Environment (e.g., Bright, cheerful kitchen countertop)
5. The Mood & Emotion (e.g., A feeling of blissful ignorance, dawning horror)
